

WLSC

THE WAY FOR A SELF-SUSTAINABLE SMART CITY

The Token WLSC

is a visionary initiative to build a fully sustainable smart city in the heart of Val Verde County, **Texas**.

The city will be designed to achieve self-sufficiency in essential resources such as water **and energy** supply **using renewable** resources.

Model of Governance

-  DIRECT MODEL DECISIONS
-  DECISIONS RECORDED IN BLOCKCHAIN
-  FULL TRANSPARENCY
-  ACTIVE COMMUNITY PARTICIPATION
-  DECENTRALIZATION IN THE DECISION-MAKING PROCESS

The **WLSC TOKEN** will be the vehicle for the participation on the Smart City development allowing every member to have an active voice in the **creation of each aspect** of the community

A WLSC will accommodate

Crypto Currency Mining
Industrial Park

Energy
Infrastructure

Electric
Transmission Lines

5G & Li-Fi Broadband
Installation

About The Andrews Aquifer,
Which Guarantees
A Solid Basis For The Sustainable
Management Of
the City's water resources

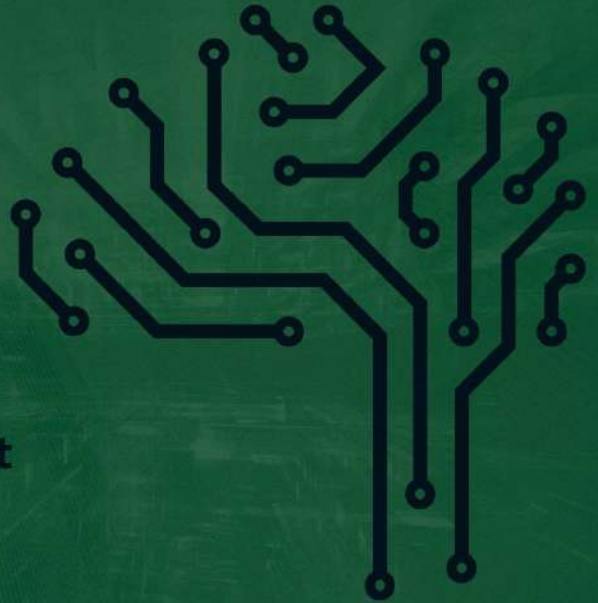

Digital Economy
With The city's
physical infrastructure

In addition to its renewable energy infrastructure and smart water management, WestLand will incorporate the concept of AGRIHOOD

An innovative urban model where agriculture and community connect in a deep and sustainable way.

**The WLSC Token is the crib
of Westland Smart City
ecosystem with several
features aimed at the smart
city development sustainability.**

Functions of WLSC

**Crowdfunding And
Collective
Financing decisions**

**Rewards And
Incentives**

**Registration And
Transparency**

**Governance
Unit**

Issuance And Distribution

The initial WLSC supply will be 4 billion tokens equally distributed, engaging the community in an inclusive and collaborative way.

The goal is to provide anyone interested in the opportunity to participate in this major development in America.

Pre Launch
