

# Summation Executive Bios

October 2025

## Our Founders

Summation was founded by Ian Wong and Ramachandran ("RC") Ramarathinam, former teammates at Opendoor. After years leading operationally intensive platforms, they set out to apply AI where the stakes are highest—executive decisions. Summation turns complexity into clear, defensible action.

### **Ian Wong**, Co-Founder & CEO

Ian is Co-Founder and CEO of Summation. Most recently, Ian co-founded Opendoor and served as CTO from the inception to going public. Before that, he was Square's first data scientist, building the company's early fraud and risk systems. He holds degrees in Electrical Engineering and Statistics from Stanford University.

### **Ramachandran ("RC") Ramarathinam**, Co-Founder & CTO

RC is Co-Founder and CTO of Summation. Most recently, RC led Opendoor's core transaction platform as Director of Engineering. He was a founding engineer at Pro.com and earlier worked at ThoughtWorks and Tata Consultancy. At Summation, he leads engineering and product architecture.
