

P-LAMP

A composition of intersecting cylinders, the P-Lamp produces a subtle moiré effect as light filters through its perforated volumes. This fixture was first prototyped in our sheet metal workshop in Mantova, Italy, and refined with our production partners. It reflects a design process grounded in collaboration and material knowledge.

MATERIALS	PERFORATED SHEET METAL
FINISHES	WHITE PC, BLACK PC, NICKEL PLATED, BRASS PLATED
LEAD TIME	8 -10 WEEKS
ORIGIN	MADE IN PADOVA, ITALY
MEASUREMENTS	ø6 1/2" x 17"H
