# ABOUT US

Founded in 2018, we started as a small business supplying mechanical materials and have since grown into a trusted industrial services company serving various reputable customers.

Today, we focus on three core business areas: corrosion- and abrasion-resistant materials, gearbox services (refurbishment and new supply), and fleet reliability solutions, professionally managed by an experienced and highly skilled team.

In delivering our services, we consistently prioritize quality and on-time delivery to ensure customer satisfaction.

Looking ahead, we remain committed to innovation and continuous business development to strengthen our competitiveness in the global market.

Finished Project

## Acid and Refinery Plant

Delivering specialized solutions for highly corrosive industrial environments, we support acid plants and refinery operations with reliable systems designed to improve safety, efficiency, and long-term operational performance.

## Power Plant

Power generation requires reliable solutions for high-abrasion environments. We specialize in wear-resistant materials, erosion-resistant systems, and industrial gearbox solutions to ensure maximum equipment reliability and long-term operational performance.

## Fleet Reliability

Comprehensive maintenance and technical support services for industrial fleets, helping improve operational reliability, reduce downtime, and maintain optimal performance.

## 01

### Corrosion Resistant Flow Solutions

Specialized component supply for extreme industrial environments with high chemical corrosion, such as Refineries and Acid Plants.

- **Piping Systems:** Industrial pipes with high durability against corrosive chemicals.
- **Valves:** Control and shut-off valves made from specialized chemical-resistant materials.
- **Pumps:** Transfer pump units designed for aggressive and acidic fluids.
- **Ducting:** Air or gas distribution systems resistant to corrosive vapors.

## 02

### Abrasion Resistant Solutions

Engineered materials designed to withstand high friction and physical wear in Power Plants and other heavy industries.

- **Wearplates:** Protective surface plates resistant to friction from hard and coarse materials.
- **Valves:** Valves featuring hardened materials for abrasive flow streams.
- **Piping:** Pipes with specialized internal linings to prevent erosion.
- **Pumps:** Slurry pumps designed to handle fluid-solid mixtures.
- **Ducting:** Gas or material channels resistant to high-speed particle erosion.

## Gearbox Solutions & Services

03

Integrated solutions for heavy-duty industrial gearboxes, ranging from new unit supply to technical re-engineering and surface restoration.

- **Refurbishment:** Complete overhaul of gearbox units to restore standard performance.
- **Reinforced Engineering (Metal Spray):** Advanced surface restoration and component reinforcement to recover worn-out dimensions.
- **Reverse Engineering:** Re-manufacturing components based on specifications of legacy or rare units.
- **New Supply:** Provision of new heavy-duty and industrial gearbox units tailored to operational needs. We also have the capability to supply new units aimed at upgrading existing gearboxes or providing direct replacements with equivalent specifications (plug & play)

## Fleet Sparepart & Electrical Troubleshooting

04

Dedicated to the operational reliability of heavy logistics fleets through specialized spare parts and advanced technical services.

- **Truck Spare Parts:** Supply of high-quality engine, suspension, and undercarriage components for heavy vehicles.
- **ECU & Electrical Troubleshooting:** Electronic Control Unit (ECU) and electrical system repairs/troubleshooting.
- **Bosch Pump Repair:** Specialized repair and calibration of Bosch fuel injection pumps to ensure optimum engine performance.

# CERTIFICATION

## Sustainability and top-quality performance are in our DNA

In 2022, we received a quality management system certificate ISO 9001:2015, an environmental management system certificate ISO 14001:2015 and an occupational health and safety management systems certificate ISO 45001:2018 from an internationally accredited institution.

These ISO certifications demonstrate our rigorous quality standards and commitment to continuously improve our business processes. It reflects our capability to deliver highest level of quality and customer satisfaction in every our services. Our dedication to on-time delivery and reliable quality shows in our repeat business and high customer satisfaction ratings.

We have been certified to work on projects at power plants, especially at **PT. PLN (holding)** and **PT. PLN Nusantara Power** throughout **Indonesia** with a **high risk** safety level.

# OUR CLIENT

We are experienced in serving various business sectors

Power Plant Industry

Smelter Industry

Mining Industry

Fertilizer Industry & Sub-holding

Pharmaceutical Industry

Building Services

EPC Company

Batching Plant Industry

Land & Maritim Transportation
