

HACKING
PHILANTHROPY
& INVESTMENT
TO SOLVE OUR CLIMATE CRISIS

“

We are at a **tipping point** in our efforts to put the planet back on track to meet our climate ambitions. To reach the speed and scale required to heal the Earth's systems, we need to unlock not only private capital and government funds, but also the philanthropic sector as a **truly catalytic force** to achieve the necessary acceleration.

Klaus Schwab, Founder and Executive Chairman,
World Economic Forum

”

WE

ARE

FACING

A

CLIMATE

CRISIS

20%

Global philanthropy to climate organizations is only 2% (US even less)

\$50B

\$50 billion climatetech investments in 2022
(25% of global)

\$3T

\$3 trillion investment per year over 10 years

GREATER INVESTMENT & PHILANTHROPY

2%

Global philanthropy
to climate is only 2%
(even less in the US)

GREATER INVESTMENT & PHILANTHROPY

2%

Global philanthropy to climate is only 2% (even less in the US)

\$50B

Climate tech investments in 2022 (25% of global)

\$3T

Investment per year over 10 years

WE NEED MORE INVESTMENT

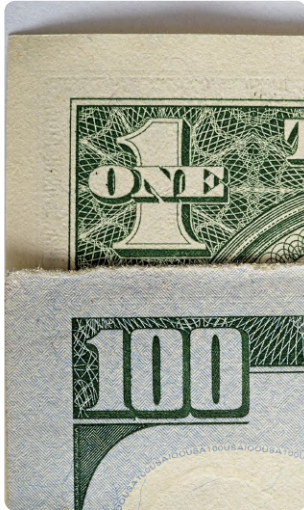

Greater philanthropic funding and investment for climate and nature will support, not detract from, existing social priorities.

PAIRING CLIMATE INVESTMENT & PHILANTHROPY

Obistius utem ea aut qui conet imi,

REGULATIONS AND POLICY SHAPE & MOVE MARKETS

Regulations, subsidies, and taxes can have immediate, and long-lasting impacts on whole industries, and the broader market.

WHO WE ARE

Felix Kramer, Founder

I call myself a “Writer - Ideator - Networker - Solutionary.” I’m an ex-entrepreneur focusing on missing pieces. I had my roller-coaster leading the successful CalCars campaign that brought us plug-in-hybrids. I invite you to go all in NOW, responding with your time and money to address our immediate democracy emergency and our climate emergency, and all they connect. I’m committed to intergenerational campaigns to protect, rescue, improve, and restore our world and our prospects. More of my back-story at Active Allies.

[LinkedIn Profile](#)

Mike Mielke, Senior Advisor

I’ve been working at the intersection of nonprofits, business, and policy for over twenty years, and on climate and clean energy in the US and abroad at various levels for twenty-five years. I enjoy being an ideator and builder who has co-founded and led a number of different organizations focused on sustainability, climate, and clean energy. When I’m not spending time outdoors or with my son, I enjoy working on and winning campaigns, and I’m passionate about advancing policies, programs, and initiatives that empower communities to address complex challenges.

[LinkedIn Profile](#)

Kimberley D.C. Schroder, Co-Initiator

From being a youth delegate at UN climate conferences to engaging in non-violent direct action for racial justice, I’ve been imagining how the world can be better and trying to live from this vision my whole life. My superpower is bridging the day-to-day with the big picture and seeing possibilities. Climbing trees, learning about the history of my family & community, and caring for plants, especially eating food I’ve grown on land I love are ways that help me resource & know who I am in the ecosystem of the earth and the flow of life through me.

[LinkedIn Profile](#)

Daisy Pistey-Lyhne, Launch Director

Growing up among the giant redwood forests of Northern California ensured that I’ve always been attuned to our human impact on ecosystems. Over the last 15 years, I’ve worked across multiple sectors to identify important gaps in building power for climate solutions, and worked among diverse constituencies to build interdisciplinary strategies that fill them. I’m a connector and network weaver who has worked as a hub in multiple powerful networks to shape strategy and focus energy on the most effective and impactful opportunities.

OUR FOCUS

A background image showing two hands, one from the left and one from the right, holding a heart shape. The hands are positioned against a bright sunset or sunrise sky, with the sun low on the horizon, creating a lens flare effect. The hands are wearing dark, textured sleeves. The overall scene is warm and hopeful.

AS A DONOR

Are you prioritizing giving to advance climate solutions?

AS A INVESTOR

Are you thinking about how to de-risk your investment, and beyond ROI to climate impact?
