THIS MONTH IN ONE MINUTE

Driving safety improved for the second month in a row, with events down 17%. Most events were overspeeding on longer routes. **Two drivers, on Bus 07 and Bus 01, account for nearly half of all events** and five of the six high-risk events, making them the clear priority for November. No accidents were recorded.

What we'd focus on in November

Bus 07

Three phone events in one month. A conversation with the driver is the single biggest safety improvement available.

Early-morning routes

Both drowsiness events happened before 7 am. Worth reviewing shift timings for Bus 01.

Recognise the best

Four drivers scored 85 or above. Recognising them sets the standard for the rest.
