Financial Crime Fighting in the digital age: AI, cross-border threats and data privacy

2026 Annual Summit

22 - 23 October 2026

Hosted by the Center of Excellence in Anti-Money Laundering
in cooperation with Go Vilnius
at the ISM University of Management and Economics

Summit Focus

Dates: 22 - 23 October 2026

Location: ISM University of Management and Economics, Vilnius, Lithuania

Theme: Financial Crime Fighting in the digital age: AI, cross-border threats and data privacy

About the GCFFC Annual Summit 2026

Financial crime is evolving rapidly. Fraud, AI-enabled deception, crypto infrastructure and digitally organised laundering networks are expanding the speed, reach and sophistication of criminal activity.

The Summit will bring together leaders from law enforcement, financial intelligence units, policy bodies, technology companies, financial institutions, civil society and international organisations. The programme will examine practical responses to AI-enabled crime, lawful data sharing, data privacy, fraud and scams, trade-based money laundering, corruption, digital assets and cross-border threats.

Through keynotes, strategic panels and two rounds of breakout sessions, participants will share operational insights, identify workable solutions and define priorities for the GCFFC work programme for 2026-2027.

REGISTRATION:
