

# CONTENT LIBRARY COURSE GUIDE

The comprehensive training courses and others are already in your account. You can subscribe for free to additional courses by going to [School > Library: Courses](#). Read descriptions of these to determine what's right for your organization below. See also the [Course Flowchart](#) for additional help in choosing.

## 2025—ESET CYBERSECURITY AWARENESS TRAINING

### FULL COMPREHENSIVE OPTIONS: 80-90 MINUTES, INCLUDES CERTIFICATE

Both options include best practices to protect yourself and your organization against today's cyber threats and crimes. These both fulfill requirements of the vast majority of insurance and compliance. Either course will resume where left off if unable to complete in one session.

#### OPTION 1: 2025—GAMIFIED ESET SECURITY AWARENESS TRAINING

This **gamified**, interactive training, the learner will be a junior cybersecurity detective in a true crime mystery exploration. Their goal is to gather intel and investigate various organizations to unravel high-stakes cybercrimes. allows the learner to choose the order of topics and includes engaging animations, mini-games to reinforce the learning, challenging scenarios, and a 15-question quiz.

#### OPTION 2: ALL-IN-ONE CYBERSECURITY TRAINING

This **linear** format is a more straightforward version of the training. Presented in a clean, blog-style format, this training includes animations, interactions, and expert video content. Learners follow the story of a company facing real-world cyber threats—an unfolding narrative that connects the lessons and brings cybersecurity challenges to life. Both options cover the following topics:

##### MALWARE

- Types of Malware
- Malware Targets
- Mobile Security
- How Malware Gets to You

##### EMAIL

- Phishing/homograph attacks
- Email Attachments
- Spam

##### PERSONALIZED THREATS

- Social Engineering
- Insider Threats

##### INTERNET SAFETY

- Public Wi-Fi
- Staying Safe while Working Remotely
- Artificial Intelligence (AI) & Deepfakes

- Web-content Filtering
- Safer Browsing
- VPNs

##### PASSWORDS

- Use Strong Passwords or Passphrases
- Password Hygiene
- Password Management
- Two-factor Authentication

The following two **course programs** are collections of short courses (which can alternatively be assigned individually). Your learners will be assigned each course as they complete the prior course, and finish with a quiz which must be passed to obtain the certificate.

#### 2025—ESSENTIAL SECURITY AWARENESS TRAINING

30 MIN, INCLUDES CERTIFICATE

This course program is designed for organizations who are limited in training time or only need to cover the basics. Each course features just the animated video and a knowledge check question for the following topics, plus a 5-question Quiz at the end. Topics include:

- Phishing
- Social Engineering
- Insider Threats
- Malware
- Safer Browsing
- Strong Passwords

#### 2025—FOUNDATIONAL SECURITY AWARENESS TRAINING

45 MIN, INCLUDES CERTIFICATE

This course contains 7 mini courses and a 7-question quiz at the end that is required to pass at 80% in order to complete this course program (~40 min). Topics include:

- Social Engineering
- Secure Browsing
- Preventing Phone Scams and Vishing
- Spot the Phish
- Portable Devices and Removable Media
- Business Email Compromise
- Physical Security

# ESET CONTENT LIBRARY COURSE GUIDE

## PROTECTING PERSONALLY IDENTIFIABLE INFORMATION (PII)

### FOR ORGS THAT HANDLE PII

15 MINUTES

- Introduction to PII
- What is Personally Identifiable Information (PII)?
- Why is it important to protect PII?
- How to protect PII

## REFRESHER COURSES

### COURSES TO ASSIGN AS REFRESHERS OR AS PHISHING SIMULATION TEST FAILS

3-7 MINUTES

#### PHISHING TEST FAILURES

The **Phishing Test Fail** mini courses are ideal to use when setting up a phishing campaign for course auto-enrollment. So when a target (learner) clicks on a link, downloads an attachment, etc. in a phishing test, they will immediately learn how to avoid this mistake on an actual phishing scam.

- **PHISHING TEST FAIL—Phishing**  
Recommended for targets who click on a link or reply to a phishing test email
- **PHISHING TEST FAIL—Social Engineering**  
Recommended for targets who enter information in phishing tests that include a splash page (such as a mock login page)

#### QUICK VIDS

The **Quick Vids** (15 options, videos plus a knowledge check) are also part of the comprehensive training courses, and don't need

to be assigned to users as part of their regular enrollment if you enroll them in one of the comprehensive training courses.

## MINI COURSES

The other **Mini Courses** (7 options) are short, blog-style courses that can be assigned whenever you'd like to refresh a certain group or all employees on a particular topic. They are packaged together with a quiz as the **Foundational** course program mentioned previously. You can subscribe to them by going to **School** > **Library: Courses**. Search for **Mini Course** at the top, then you can **Preview** or **Subscribe** (for free) to any you'd like to enroll.

## MINI GAMES

### GAMES THAT CAN BE ASSIGNED AS YOU PLEASE TO KEEP EMPLOYEES SHARP

5-8 MINUTES

These 5 Mini Games are part of the Gamified ESET Security Awareness Training. They can be assigned as a refresher game for a certain topic, or in addition to any non-gamified training course as a fun way to reiterate a topic and help it stick.

You can subscribe to them for free by going to **School** > **Library: Courses**. Search for **Mini Game** at the top, then you can **Preview** or **Subscribe** (for free) to any you'd like to enroll.

Games include:

- Personalized Threats—Spot the Signal
- Passwords Peril
- Protect Atlantis from Phishing Attacks
- IoT: Ghosts in the Machines
- Keep Your City Safe from Malware Attacks
