We've been working with Cyberfox / Digital Tails Group for a while now, and I can confidently say they've been an incredible partner for our team.

We originally brought them on to support our machine configurator, but their role quickly expanded—they now help us with everything from 3D animations and anatomy modeling to Photoshop work and one-off 3D tasks. No matter what we've thrown at them, they've delivered high-quality results, often ahead of schedule.

They have a super talented team of artists and project managers. Communication is always clear, timelines are realistic (and often beat), and they really make the process feel effortless on our side. What we appreciate most is that they feel like an extension of our team. They're creative, quick to respond, and always open to feedback. It's clear they care about the work and take pride in getting things right—not just technically, but visually and strategically too.

If you're looking for a team that's not only technically skilled but also easy to work with and genuinely invested in your success, Cyberfox / Digital Tails Group is the team you can count on.

Best,
April G.
