Why Aurora Belongs on Your Platform

Always-on customer support

Day or night, Aurora is here to answer questions instantly - no waiting

Tailored shopping experiences

Aurora offers your customers personal recommendations based on their browsing and search

More time for qualitative tasks

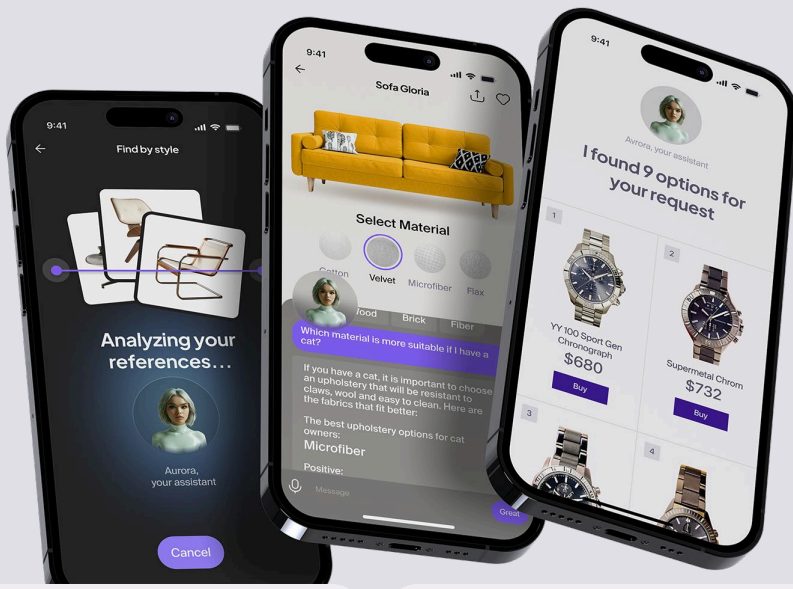

She takes care of routine tasks, and frees your human support team that can now focus on qualitative tasks

System integration

Aurora works with order tracking, returns, and customer interactions systems with no disruptions

Powered by Real-World Scenarios

Recognizes tone and intent

for a natural response and image representation

Hi, I'm a little upset. I ordered a sofa a week ago and it still hasn't arrived.

Hello! I am very sorry to hear that you are faced with such a situation. It seems that there was a delay in the warehouse due to heavy workload

Equipped with robust language and localization

to connect with diverse customer bases

Top-notch security measures

that align with GDPR and regional regulations to protect your customers' data and privacy

Adaptable APIs

make it easy to connect with your existing platforms

Implementation Steps

Step 1

Discover and understand

Firstly we will collaborate closely to understand your goals, customers, and technical needs

Step 2

Design and build

Then we'll create Aurora's core functions according to your brand

Step 3

Integrate and test

We'll integrate Aurora with your existing systems, and test her performance

Step 4

Launch and refine

Once live, our team provides support and continuous optimization to ensure Aurora grows alongside your business

Flexible Integration

Universal compatibility

Works flawlessly across all browsers and devices

Lightning-fast loading

Ensures a smooth user experience without lags or delays

Plugin-free operation

No additional software required

Integrates with popular CRM and ERP systems
