Strategy

- Goal:** A systematic complement to discretionary portfolios for long-term participation in global growth.
- Robust Momentum Strategy:** We combine multiple momentum methods across different time horizons, for a robust and dynamic model.
- Global Diversification:** One universe across all asset classes, equities, bonds, commodities, real estate and money markets, implemented with cost-efficient ETFs.
- Momentum Rotation:** Each month, the portfolio rotates into the asset classes with the strongest momentum.
- Dynamic Exposure:** A methodology grounded in financial theory that analyses the market environment and steers the investment ratio on a rule-based basis.

Investors should read the key information in the factsheet and termsheet before investing. Shares in the investment products mentioned in this publication may not be offered, sold or delivered to certain persons or in certain jurisdictions or to persons with connections to certain jurisdictions. Further information can be found in the term sheet. The investment involves substantial risk of loss and is not suitable for all investors. Consider your experience, investment objectives, assets, income and risk appetite before investing in any of our products. There is a possibility that you may lose some or all of your initial investment. You should therefore not speculate, invest or hedge if you cannot afford a loss, have borrowed the capital, need it urgently or the amounts are necessary for your private living or that of your family. You should be aware of all the risks associated with trading and seek the advice of an independent financial adviser if you have any questions. All financial investments carry an element of risk. Therefore, the value of your investment and the income from it will fluctuate and your original investment amount cannot be guaranteed. The value of equities and equity-related securities may be affected by daily price movements on the stock markets. Other factors include political and economic news and major corporate events. Counterparty risk: The insolvency of companies that assume custody of assets or act as counterparties for derivatives or other instruments may expose the strategy to losses. The figures shown relate to past performance. Past performance is not a reliable indicator of future performance and should not be the sole factor in selecting a product or investment strategy. The simulated performance is shown in the currency shown in the product details table and adjusted for trading fees, issuer's fee, management fee and performance fee. The key figures were calculated on the basis of daily prices. Due to currency fluctuations, your return may be higher or lower if you invest in a currency other than the one in which the performance was calculated. Investments in securities are subject to non-existent or loss of protection of intellectual property rights, rapid technological changes, regulatory changes and changing competition.
