

POWER BI TRAINING INSTRUCTOR-LED INTRODUCTION FOR BUSINESS & IT TEAMS

Enable your teams to design, build, and share trusted Power BI reports with confidence.

ABOUT US!

We focus on **sound data modeling, governance, and best practices**, helping teams avoid common Power BI pitfalls and accelerate adoption. With our **checklists and process models**, your team has a practical reference to guide the development and deployment of reports and dashboards.

Our **hands-on, instructor-led training** emphasizes **real business scenarios**, not abstract demos, so your organization starts seeing value immediately.

COURSE TAKEAWAYS

1 Turn Business Questions into Insights

Build dashboards and reports that answer real business needs.

2 Understand Power BI & Analytics

Learn core BI concepts and Power BI's role in modern analytics.

3 Model & Prepare Data

Connect to data sources and build reliable data models aligned to business rules.

4 Create Interactive Reports

Develop dashboards with slicers, filters, drill-downs, and clear visuals.

5 Share & Govern Insights

Distribute securely with Power BI Service and understand high-level architecture.

WHY THIS TRAINING?

REAL-WORLD, OUTCOME-DRIVEN TRAINING

Led by experienced data consultants with a strong focus on business value, modeling, and governance—not just visuals or tools.

PRACTICAL AND STRUCTURED APPROACH

Includes clear development steps, process flows, and a ready-to-use dashboard/report requirements template.

PREPARE FOR PL-300 CERTIFICATION

Training that builds consistent practices and prepares participants for the Microsoft Power BI Data Analyst Associate (PL-300) certification.

WHO IS THIS COURSE FOR?

Ideal for business analysts, managers, Excel users transitioning to Power BI, leaders who consume or sponsor analytics, data, BI, and IT professionals new to Power BI, and analysts preparing for the PL-300 Power BI Data Analyst Associate certification.

Not intended for advanced DAX developers or enterprise semantic model specialists.

FORMAT & DELIVERY

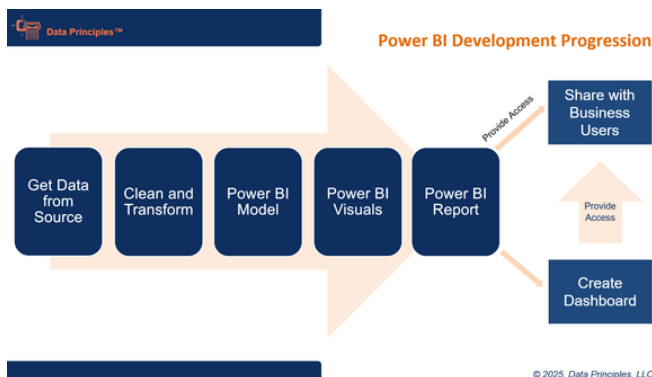

Recommended Duration: 3 days (customizable), available as a single session or split across multiple days.

Hands-On Learning: ~35–50% exercises, real-world scenarios, guided labs, quizzes, and a final assessment to measure readiness. Students will connect to data, build models, prepare data, design reports and dashboards.

Custom Case Studies: Examples can be tailored to your organization's data and use cases (additional charge may apply)

Delivery Options: Live Online (Zoom or Teams), In-Person (on-site), or Custom Recorded Sessions.

Customizable Training: Content and schedule can be tailored to your team's needs (additional charges may apply).

WHAT THIS COURSE COVERS

01

Power BI Foundations

Business intelligence fundamentals, Power BI architecture, and data connectivity options.

02
