

# Carbon Reduction Plan

Supplier name: Horizon Supply Chain Ltd.

Publication date: 20/08/2024

## Commitment to achieving Net Zero

Horizon Supply Chain Ltd. is committed to achieving Net Zero emissions by 2045.

## Baseline Emissions Footprint

Horizon Supply Chain Ltd. is a newly established company and, as such, has not yet produced any greenhouse gas emissions. As we embark on our journey towards achieving Net Zero by 2045, our baseline emissions are set at zero.

Since no historical data exists for our emissions prior to the implementation of our carbon reduction strategies, we will use our first reporting period as our Baseline. During this period, we will establish and adopt carbon accounting tools to accurately measure, monitor, and report our emissions. This will allow us to set a clear reference point against which future emissions reductions can be assessed.

<b>Baseline Year: 2024</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
As Horizon Supply Chain Ltd. is a newly established organization, there is no historical data on greenhouse gas emissions prior to 2024. Consequently, our baseline emissions for the year 2024 are recorded as zero (0.0 tCO <sub>2</sub> e) across all scopes and updated at the end our first quarter.	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	0.0 tCO <sub>2</sub> e
<b>Scope 2</b>	0.0 tCO <sub>2</sub> e
<b>Scope 3 (Included Sources)</b>	0.0 tCO <sub>2</sub> e
<b>Total Emissions</b>	0.0 tCO <sub>2</sub> e

## Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	0.0 tCO <sub>2</sub> e
Scope 2	0.0 tCO <sub>2</sub> e
Scope 3 (Included Sources)	0.0 tCO <sub>2</sub> e
<b>Total Emissions</b>	0.0 tCO <sub>2</sub> e

As a new organization, our current emissions for the reporting year 2024 are recorded as zero (0.0 tCO<sub>2</sub>e) across all scopes. This baseline reflects our commitment to beginning sustainable by adopting carbon accounting strategies right away and utilizing this baseline as a reference for future emissions reduction efforts.

### Emissions reduction targets

As Horizon Supply Chain Ltd. is in its initial stage of operations with current emissions recorded as zero (0.0 tCO<sub>2</sub>e), we do not have specific reduction targets set at this time. We plan to establish meaningful and data-driven emissions reduction targets once we have collected and analyzed emissions data from our first operating quarter.

By the end of our first operating quarter, we will assess our actual emissions and set targets that reflect our operational footprint and reduction potential. These targets will be aligned with our overarching goal of achieving Net Zero by 2045 and will be updated and communicated as part of our ongoing carbon management and reporting processes.

These targets will be refined and updated based on our ongoing carbon accounting and assessment processes. We are dedicated to implementing robust strategies and leveraging carbon accounting tools to monitor our progress and ensure we stay on track to meet our Net Zero goal.

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

As of our baseline year 2024, Horizon Supply Chain Ltd. is in the process of obtaining ISO 140001 certification, which will demonstrate our commitment to environmental management and ongoing improvements in our carbon reduction strategies. Additionally, we are pursuing a Pending B Corp certification to ensure that our business practices meet rigorous standards of social and environmental performance, accountability, and transparency.

At this stage, the carbon emission reduction achieved from these efforts is not yet quantifiable. However, once our certifications are completed, they will significantly contribute to our environmental strategy and our goal of reducing emissions as we begin our operational activities.

Looking ahead, Horizon Supply Chain Ltd. plans to implement several carbon reduction measures, including:

- **Implementation of Energy-Efficient Technologies:** Adoption of LED lighting and motion sensor controls to reduce energy consumption.
- **Reducing Company Travel:** Policies to minimize travel and flights such as carbon emission budgets for business travel, promoting virtual meetings and remote work options.
- **Sustainable Distributor Fleets:** Transitioning all our supplier distributor's fleets to electric, hybrid, or sustainable liquid gas vehicles to further reduce emissions across our supply chain.

We will continue to evaluate and expand our carbon reduction initiatives based on the data we collect and our ongoing assessment of environmental impacts, ensuring that all projects are aligned with our commitment to achieving Net Zero by 2045.

### Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in
