

SpeedPack 550 OFFL – Quick User Guide

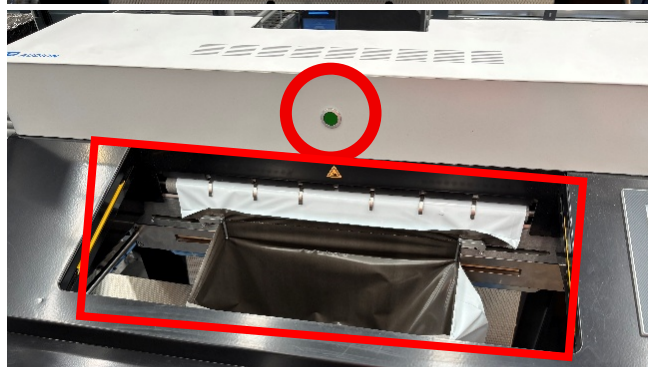

Waiting for coding job – Machine is waiting for an item to be scanned.

Waiting for bag length selection – Machine is waiting for a bag length to be selected.

Watch the green light! When ON machine is safe and ready to place an item in the bag.

Green light is OFF, machine waiting for an item to be scanned or machine is in operation.

If item or hand breaks the safety light curtain when green light is off → machine goes in emergency stop for your own safety!

How to continue operation when machine goes into emergency stop:

- Acknowledge the emergency stop message on the screen.
- Reset machine by white button, wait for the ready indication (top right hand corner).
- If the machine asks for initialization press: **NO**
- Press green button to engage machine again.
- Press green button again, and the machine will start. It will finish its cycle, either making a reference bag or closing the current bag.
- Machine will wait for coding job. Press reprint if you would like to produce the same label as the last bag.
