

DARK LINE

TECHNOLOGY SOLUTIONS

Company Profile 2026

POWERING A **SUSTAINABLE FUTURE**
THROUGH INTELLIGENT TECHNOLOGY

*“Founded
with a
passion for
innovation”*

Dark Line Technology Solutions is a South African company dedicated to creating smart solutions that bring technology to our daily life.

Founded with a passion for innovation, Dark Line specialises in IoT-enabled energy-management systems, smart devices, and technology products designed to meet the unique demands of the African market.

What we STAND FOR

MISSION

Driving the future
to *clean,*
renewable energy.

VISION

*A sustainable world
for generations to come.*

VALUES

- Excellence
- Ingenuity
- Efficiency

Founded in 2019 with a vision to improve our future through technology.

After identifying the increasing demands of energy, Dark Line became focussed on contributing to a cleaner and more sustainable future.

From concept to completion, INNOVATION TO IMPLEMENTATION ...

REMOTE MANAGEMENT & MONITORING

Dark Line's IoT infrastructure enables customers to remotely monitor and control devices, manage energy loads, receive real time data, deploy over the air firmware updates and perform diagnostics – all designed to reduce operational costs and maximise system uptime.

PRODUCT DESIGN & CONCEPT DEVELOPMENT

- Requirements analysis and problem definition
- Technical feasibility studies
- Industrial design and functional design
- Electronic hardware design
- Firmware and software architecture
- User experience and usability considerations

ON-SITE ENGINEERING & TECHNICAL SUPPORT

- Installation guidance and commissioning
- On-site diagnostics and troubleshooting
- Performance optimisation and system tuning
- Installer and technician training (hands-on or remote)
- Rapid support response due to local presence
- Long term operational support

Great things come FROM A GREAT TEAM

IOT PLATFORM INTEGRATION & DEPLOYMENT

- Device onboarding to IoT platforms (Gecko Hub or partner systems)
- Cloud integration and remote monitoring setup
- Data analytics and dashboard configuration
- Secure device provisioning and ongoing connectivity support

PROJECT MANAGEMENT

- End to end project oversight
- Timeline and resource management
- Coordination between engineering, manufacturing and installation teams
- Risk Management and performance tracking
- Ensuring effortless project delivery from concept to customer

AFTER SALES CUSTOMER SUPPORT

- Warranty support and repairs
- User support via phone, email or on site visit
- Ongoing enhancements and upgrades based on customer requirements

Technology Products FOR EVERYDAY LIFE

- Dark Line delivers a full suite of IoT-enabled energy management products that are field-tested and proven in established sectors
- Smart automation, load management, and power optimisation hardware
- Intelligent monitoring systems with real-time data, AI-driven analytics, and cloudbased remote management
- Wireless and low-power communication technologies for residential and industrial applications
- Local manufacturing and distribution for faster turnaround, quality control, and reduced logistics costs
- End-to-end project support from requirements analysis and budgeting through to installation and optimisation
