

Senior Front-end Developer JD

Aviso is seeking Rockstar Developers, to work in Aviso's Engineering team. Reporting directly to the VP of Engineering, you will be working with the founders, sales, product, and customer success teams to ensure that customers are delighted with Aviso solutions. You should be passionate about solving hard real-world enterprise problems by architecting, building, and operating a highly scalable infrastructure.

Senior UI Engineer role gives you an opportunity to :

- Minimum 6+ years of experience in designing and developing user interfaces using any JS framework, preferably Vue JS / Angular best practices.
- Expertise in Global state frameworks, like redux, and vuex.
- Highly proficient with the JavaScript language and its modern ES6+ syntax and features
- Good understanding of HTML5 and CSS3, including {{ Sass or Less depending on your technology stack }}
- Experience with D3 will add an advantage
- Hands-on experience in browser-based debugging, performance testing software, and deployment, with an attention to detail that supports the software development cycle.
- Should be able to design and build modern user interfaces to enhance application performance.
- Monitoring and improving front-end performance
- Documenting application changes and developing updates
- Skilled in Cutting-edge frameworks and technologies.
- Building reusable components and front-end libraries for future use
- Coordinate with internal teams to understand user requirements and provide technical solutions
- Manage individual project priorities, deadlines, and deliverables.
