EXECUTIVE SUMMARY

This guide seeks to provide a general overview of Changing Tides Limited’s diverse range of technologies and services, complementing the activities of its State, Private Sector and Civil Society clients in the fields of Community Upgrading, Mining Services, EPC and Entrepreneurship.

More specifically, water purification & recycling, power generation, food production and infection control make up its Community Upgrading division. The detection of mineral deposits and the procurement of African Rock Phosphate for fertilzer production in India, its Mining Services division.
Through the Changing Tides Investment Committee, the group and its partners are expanding their activities into Engineering, Construction & Procurement project in both the energy and infrastructure sectors.

Finally, the changingtidesgroup.com website is also host to an international professional network made up of over 700 entrepreneurs and professionals spanning over 65 countries and to a wealth creation and mentoring initiative called Wealth-Point Legacy on a mission to develop 20 of the continent and World’s next servant millionaires by 2017 within both the Fuel and Consumer (trade and service sectors) Industries across dozens of countries around the World.

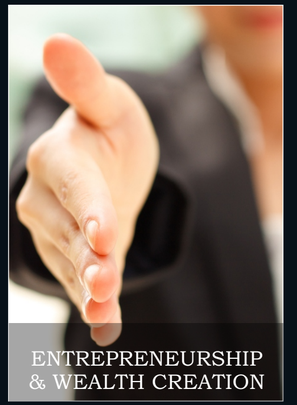

OUR PORTFOLIO

AT A GLANCE

FOREWARD

The organization's approach to everything it does is one of long-term committment and support. This has enabled it to intimately understand and effectively respond to both the challenges and opportunities faced by the clients it serves and has allowed it to build deep and trusted relationships, leading to ever increasing responsibilities. The innovation and combined impact of its technologies and areas of expertise are always aimed at providing concerted, coherent, comprehensive and cost conscious solutions to urgent and often difficult problems and needs.

Its substantial diversification into **Mining Services & EPC** has been the result of strong demand for assistance and support from international clients seeking services from an entrepreneurial, nimble, flexible and trustworthy partner used to operating in challenging environments. This is a true testament to the increasing confidence in the professionalism and effectiveness Changing Tides Limited has become known for. These divisions are also providing the group with greatly increased financial stability, giving it the ability to be more independent and proactive in its Community Upgrading interventions as well as its wealth mentoring initiative called **Wealth-Point Legacy**.

Wealth-Point Legacy provides disruptive wealth blueprints and mentoring to hundreds of people across the continent and World by through the use of models which have been proven to hold the greatest promise for building genuine wealth while making a huge positive impact to people and the environment the World over.

IN GOOD COMPANY

EXEC. DIRECTOR: Rajsing Gopaul

DIRECTOR: John Whatley

DIRECTOR: Norman Noland

The team at Changing Tides Limited are qualified professionals who are well versed in their line of business. Members of the Board of Directors are dedicated specialists who are committed to a standard for excellence in the management of the Company. The executive director has many years of experience in the offshore sector including Trust administration while the non-executive directors are highly qualified professionals with a sound track record in the legal sector, accounting and compliance.

Rajsing Gopaul: Mr. Gopaul started his career at KPMG in Port Louis in 2001, where he was trained as an offshore auditor. In February 2002, Mr. Gopaul joined Financial Trust (Mauritius) Ltd (now known as Dale International Trust Company Limited) and soon became a Senior Trust Administrator responsible for the day-to-day administration of a large portfolio of trusts and companies. In November 2003, Mr. Gopaul took a different challenge by accepting the position of Administrative Manager of Bella Investment Services Limited, a financial intermediary company and consultant to high net worth individuals. In July 2004, he was promoted to the position of Director of that company and of its subsidiary companies. He currently acts as CEO of Dale International Trust Company Limited and also acts as director on client companies in addition to being a Protector for various Trusts established by Dale's clients. Mr. Gopaul holds a honours degree in Economics from Delhi University (India) and is fluent in English, French and Hindi.

TRUSTED COUNCIL

Judith Weidemann

Dr. Clive Dutlow

Rustum Naidoo

JUDITH: Director at Renewable Energy SA (Pty) Limited and Marketing Director at Kalahari Kid Corporation, she is a Meat Specialist & Trader; Exporter of Ornamental Palms & plants from South Africa; Exporter of Food & Food Products from South Africa. She is a Member of the Institute of Public Relations; the Institute of Directors; the Institute of Estate Agents; the Red Meat Association of SA; SA Exporters Institute; the Chamber of Commerce Johannesburg; SA Nurseries and Growers Association and was nominated Exporter of the Year 2009.

CLIVE: Clive holds a PhD in Chemical Pathology from the University of Cape Town. He owns an environmental remediation practice and has consulted to the public sector, parastatal, oil & mining companies. Clive has served as a director of NGOs involved in SMME development.

RUSTUM: Rustum hails from Cape Town and has been resident in Johannesburg for the past twenty years. Having started his first business at the age of sixteen and being a proactive entrepreneur he has exposed himself and has a keen insight into industries such as Banking and Loyalty card programmes, Green and Renewable Energy, Media, Information Technology, Property, Telecommunications, Farming and many others. He has an international business network and is aligned with broad based empowerment companies and captains of industry whom he enjoys close business and personal relationships with.

WATER SECURITY

PURIFYING TECHNOLOGIES
FOR DRINKING & RECYCLING WATER.

» SENTINEL: The trailer mounted mobile Sentinel water sterilisation units are standalone self-contained and lockable units which are easy to operate and can be rapidly deployed, to provide drinking water to up to 1000 people per day. These units are electronically controlled to minimize unnecessary human error.

» HERCULES: The Hercules solar powered water purifier is designed to provide clean and safe drinking water to rural communities where the existing water source is unsafe and where the power supply is unreliable or non-existant. It was developed in response to a need expressed by a local NGO. The brief was to build a purifier that effectively disinfects approximately 4000 liters of water per day.

» GUARDIAN: The Gardian recycling system was developed for potential clients such as game lodges, farming ventures and remote shopping, industrial and housing complexes, as a turnkey system for treating the sewage. The great attraction of the system is that the treated sewage water is safe to use for irrigation, reintroducing in to rivers or dams, or even in to the house flush systems.

SENTINEL

HERCULES

GUARDIAN

HEALTH SECURITY

HUMAN WASTE MANAGEMENT.
RESIDUAL INFECTION PROTECTION.

» TALON | Bio Remediation: Poor human waste management results in an extremely critical health scenario, unbearable smells and unparalleled danger zones. Talon facilitates a process whereby human faecal waste is broken down faster than its natural occurrence through a non-chemical based additive (Powder) to rapidly speed up the
degrading process of faecal waste.

» SHERPA | Waterless Sanitation: The Sherpa has zero environmental impact. It uses no water. It uses no chemicals. Its advanced technological design enables the processes of dehydration and evaporation to occur naturally without any soil or water contamination; as the decomposition takes place in a sealed unit. Nature, namely sun and wind, aid the processes for waste decomposition – both of which cost nothing. The design is such that there is no contact between people and the system. This has to be the future of all sanitation systems; no water wastage, no soil or water contamination, minimal maintenance costs.

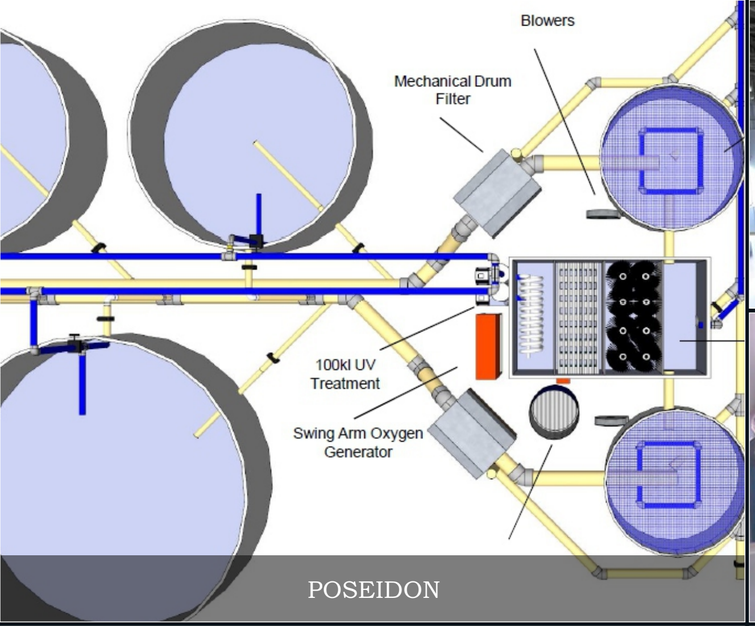

» VANGUARD | Disinfectants & Sterilants: The Vanguard range of eco-friendly disinfectants and sterilants includes Cold Sterilant; Residual Disinfectant; Concentrated Antimicrobial Solution; Disinfecting Cleaner; Disinfecting Instrument Precleaner; Disinfecting Wipes; Odoractant; Cold Sterilant; Disinfecting Hand Wash; Disinfecting Hand Gel; Disinfecting Suction Cleaner; Disinfecting Lubricant; Laundry Solution; Wound Protection Gel; Soothing Gel; Air Sanitiser.

POSEIDON

CONSTELLATION

FOOD SECURITY

FISH & AGRICULTURE FARMING SOLUTIONS.
ORGANIC COMPOSTING EQUIPMENT & ORGANIC FERTILIZERS.

» POSEIDON | Aquaculture, Wermiculture, Hydroponics: Specialising in Recirculation Aquaculture Systems (RAS). Subject to water conservation and retention of heat energy our RAS may include an integrated approach with that of wermiculture and hydroponics, combined with the ability to generate results. Due to the strategic nature of re-circulation aquaculture systems we have developed a system that guarantees optimal production environment from both a management and biological perspective.

» CONSTELLATION | Farmer's Kit: The Constellation Farmer's Kit (FK) was created with the aim of allowing small scale farmers affordable access to modern agricultural technologies, methods and inputs of the highest standard.

Inside the Farmer's Kit: Farmer's Greenhouse; Drip Irrigation System; Collapsible Water Tank; Farmer's Sprayer; Gold Medal Seeds; Fertilizers & Agrochemicals; Personal Protective Equipment; Training; Annual Agro Support Package.

» LIBERATOR | Organic Compost: We have been involved with the development of technology that allows for effective harvesting of Water Hyacinth that can be utilised in a commercially viable way for the production of organic compost.

LIBERATOR

TITAN II

STORM SHADOW

NIGHTWATCH

ENERGY SECURITY

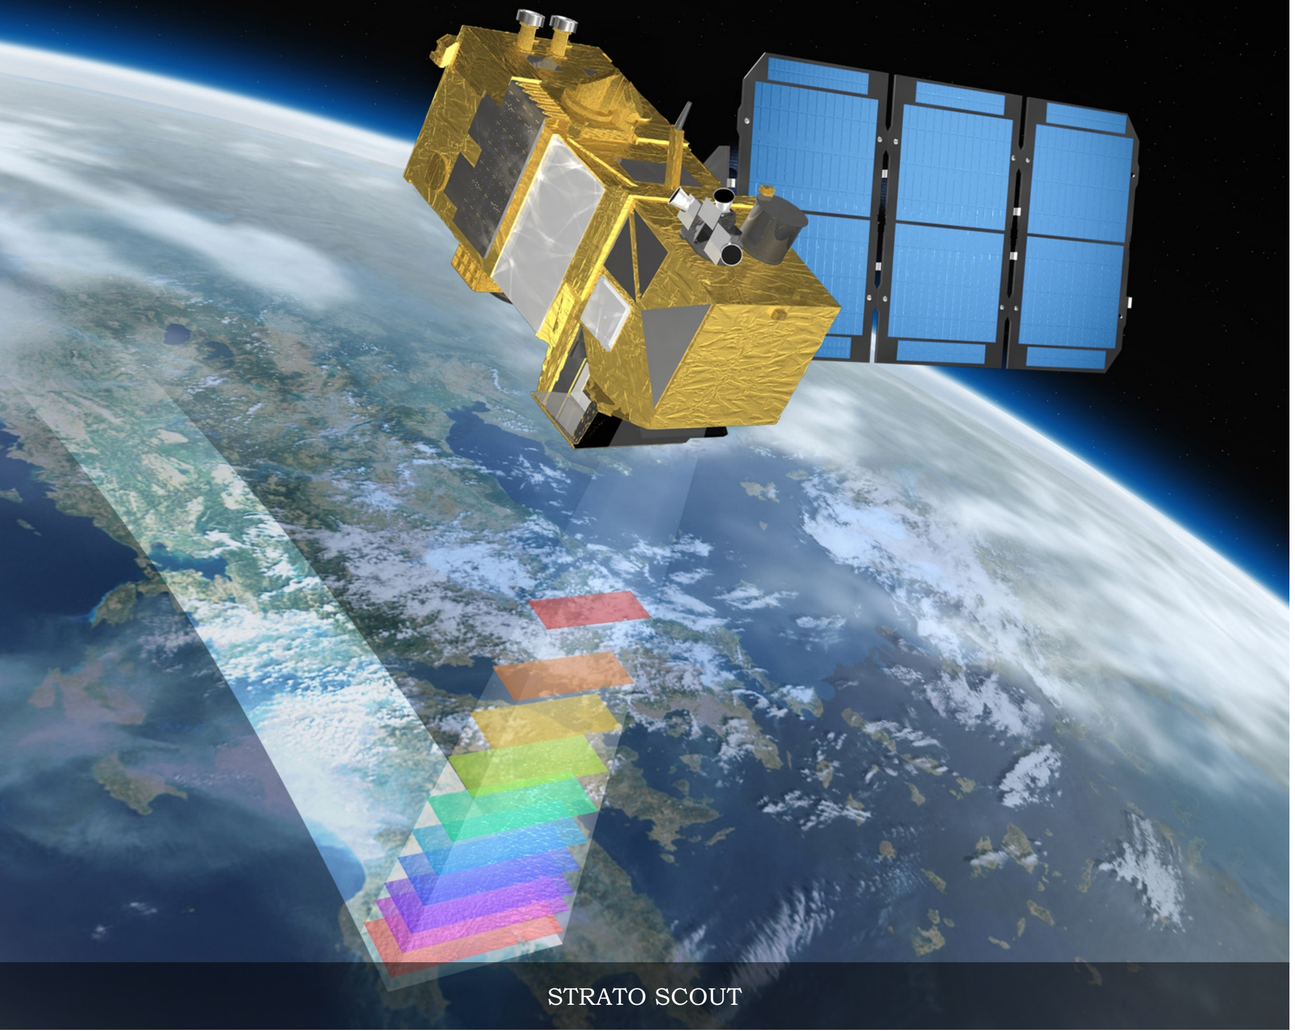

USED LUBE OIL | ORGANICS | USED VEGETABLE OIL TO ENERGY

» TITAN II | Waste Lube Oil Reprocessing Into Industrial Fuels: The reprocessed product is sold as a substitute for heavy fuel oil that is derived from crude oil.
We buy used oil from environmentally approved collectors. Using a series of treatment steps, we purify and process used lube oil into a low grade low sulphur industrial fuel oil.

» STORM SHADOW | Organics To Oil : ***INPUT*** - MSW (domestic and commercial municipal solid waste); All kinds of plastics; Animal residues; Waste oils; Fats; Sludge waste; Agricultural waste; Bio mass; Cut materials; Oil sands. ***OUTPUT*** - Diesel Fuel; Distilled Water; Ash (Fertilizer); CO@ (reduced) chemicals. APPLIANCE - Fuel (diesel, gasoline, kerosene); Generator (fuel for electricity). ADVANTAGES - No emissions; without impact on the food chain; low temperature; low energy consumption.

» NIGHTWATCH | Used Vegetable Oil To Biodiesel : Supplier of turn-key decentralised biodiesel processing equipment to ensure Energy Security.
We provide five models ranging in capacity from 1,000 litres per day to 50,000 litres per day for transport or to generate power. Capital set-up costs are low and because there is no complex fit out, they quickly return sustainable profits. They offer immediate payback and long term investment protection.

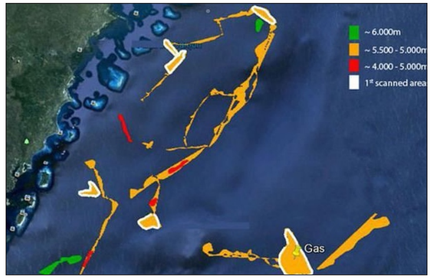

SATELLITE SCANNING

LAND-BASED MINERAL & LIQUID RESOURCES

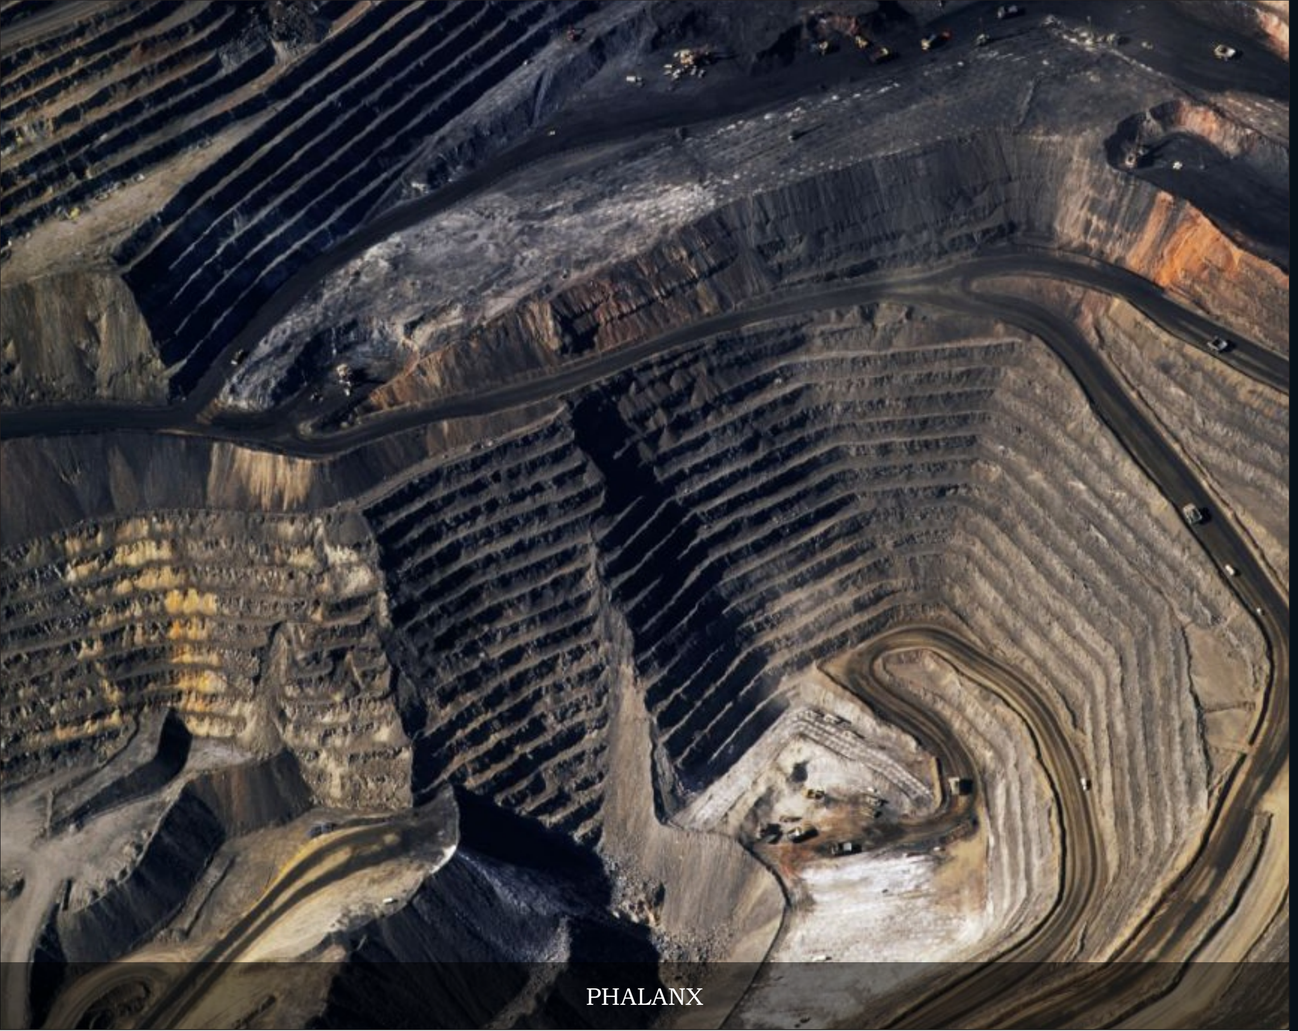

WATER-BASED OIL & GAS RESOURCES

A revolutionary scanning technology which is capable of accurately detecting mineral as well as gas, oil and water deposits up to a depth of three kilometers below the surface of the ground. This technology was developed by Austrian and German scientists, researchers and engineers.

Conventional Prospecting: 2-3 years of prospecting; Millions of USD in high risk investment before a reasonable result.

Satellite Scanning: 2-15 days of prospecting; Significant cost reduction for prospecting and site exploration; Response time and strategic decisions are based on real time information.

PHALANX

ROCK PHOSPHATE

Changing Tides Limited has been contracted by one of India's most successful and best known diversified family-owned businesses to assist it in divesting from the Middle East and North Africa in order to secure new sources of Rock phosphate - procurement and downstream investments - in Africa, for its 3 fertilizer manufacturing complexes in India.

The 53 year-old company, with a turnover of over $200 million, has primary interests in EPC & Industrial Equipment Supply, manufacturing Fertilizers & Agro-Inputs (Anand brand), and manufacturing Processed Foods.

THE ENTREPRENEURS' CIRCLE

For additional information, please visit **https://db.tt/zrnv7EQA**

ENTREPRENEURS MAKE THE DIFFERENCE...

Changing Tides Limited has for years recognized the importance of entrepreneurs and networking. Entrepreneurs are known for having incredible passion and great ideas but also for their will to turn their ideas into reality and in the process, shape and transform their communities, countries and our World. Everything we see around us is the result of their fresh thinking and hard work. The Entrepreneurs' Circle was started 3 years ago to celebrate and promote entrepreneurs so that they would become aware of each other and help one another by leveraging their experiences, stories, industry capabilities, locations around the World and resources. Today The Entrepreneurs' Circle is host to over 600 entrepreneurs and entrepreneurial professionals spanning 62 countries around the World and ranging from newly created companies to decades old multi-million dollar family-owned corporations as well as large membership based women, business and networking organizations, ensuring that we are able to influence, be influenced by, work and grow with many of tomorrow's global movers and shakers.

TOYOTA

ABOUT OLIVIER…

Olivier's international education & upbringing began at the age of 10 years old when he was sent to an international boarding school in Switzerland - while his family emigrated to Southern Spain for the next 15 years - leaving behind a central African region that descended into what became known as Africa's First World War. Greatly affected by the disparity between his priviledged upbringing and the brutality and poverty he had been spared from, Olivier initially became a devoted student of history, armed conflicts, armed forces and combat sports and it wasn't until the latter part of his studies at Duke University in North Carolina that he was mentored in spirituality and Zen Buddhism by World Renowned guru & entrepreneur August Turak. His intense spiritual journey subsequently led him into the world of personal development, emotional intelligence, Neuro Linguistic Programming, sales and entrepreneurship. He continued his higher education at St. Louis University in Madrid and at The University of Cape Town.

His company Changing Tides Limited is today widely recognized as an efficient and impactful integrated international platform of specialist partner companies providing important solutions across a range of industries, and Olivier as a discreet entrepreneur who's friendship and counsel are valued by international entrepreneurs, heirs of important family owned corporations across the World including Latin America - as a fluent Spanish speaker -, politicians & diplomats and even members of European, Arab and African Royal families.

He is married and drives a pick up truck; is a very decent ground fighter who works out regularly at 5am; an avid Advanced scuba diver who aspires to qualify as a Rescue diver; an accomplished horse rider and owner of a magnificent Great Dane; a fascinated researcher of ancient history & ruins and still a great fan of military documentaries and personal development audio seminars.

He is committed to being a proactive builder of the Africa of the future and an ambassador for the continent. His father is the person he looks up to the most.
