Fire extinguisher maintenance is important for everyone's safety.

Professional inspection of fire extinguishers is required annually.

Portable fire extinguishers are the first line of defense in the event of a fire. Our professionally trained and certified technicians will make certain that your extinguishers are suitably located, charged and are in proper working order. We conduct inspections in accordance with OHSA/NFPA10 codes along with other local, state and federal ordinances.

Annual inspections ensure you Fire Extinguisher:

- Is accessible when needed
- Has enough pressure to work properly
- Is in its designated place and has not been used
- Contains no obvious defects such as insufficient pressure puncture holes, corrosion, or broken or missing parts

Our comprehensive services include more than "just" an inspection and tag, We address any repair or recharge of any extinguisher that does not meet the above requirements.

Alarm Detection Systems follows the The National Fire Protection Association (NFPA) stating that all portable fire extinguishers be visually inspected on a monthly basis (NFPA 10, Section 6.2.1) and maintained by a licensed fire protection company on an annual basis.

We offer easy-to-understand, quality reports regarding our testing results. Obtain a no-obligation evaluation of your commercial fire alarm system and quote for inspection today.
