

TECH FORGE GROUP LLC

Federal IT - Defense Health - Cybersecurity - Infrastructure Architecture

MISSION STATEMENT

Tech Forge Group delivers enterprise IT infrastructure and cybersecurity to federal health agencies. Our team is actively embedded in DHA production systems, supporting Navy Medicine and over 100 military treatment facilities worldwide under a \$173M NIWC Atlantic SeaPort-NxG contract.

We were built to close the gap that kills federal IT programs: the distance between decision-making engineers and the teams that need them. Our team has operated in NIPR, SIPR, and classified DoD health environments for over 16 years. We understand the constraints, the compliance requirements, and what's actually at stake from the inside.

We are actively expanding the teaming partnerships that deepen our mission reach. Whether you need a cleared SDVOSB sub, a capable prime for a set-aside, or a partner for an IDIQ pursuit we built this firm to be exactly that. Built to partner. Built to perform. Built to last.
