

AGORA

Human sales talent. Real-time AI coaching. Scaleable outreach.

VISION

AGORA AI is building the operating layer for the next generation of sales teams:
human-led, AI-supported, performance-tracked, and built to scale.

The Problem

Businesses spend heavily to generate leads, but many opportunities sit untouched because internal teams lack the time, staffing, or systems to contact every prospect quickly and consistently.

- Slow response times and missed follow-ups
- Overloaded sales teams and inconsistent outreach
- High hiring and training costs
- Limited capacity to work large lead pools

CORE INSIGHT

Most companies don't have a lead problem.

They have a follow-up problem.

The Solution

AGORA AI acts as an extension of your sales team. We provide trained human agents who contact, qualify, and follow-up with leads while using AI-supported tools to improve messaging, consistency, coaching, and performance.

Why AGORA AI

- Human-led conversations that preserve trust and nuance
- Real-time AI coaching and call support for better execution
- Scalable outreach without internal hiring or heavy training
- Flexible use across lead-driven industries
- Performance tracking and operational visibility
