FULL MEDIA BIO

Dr. Greg Kimble isn't a motivational speaker offering high-fives and platitudes—he's a builder who earned his lessons the hard way. After years of scaling businesses, hitting wall after wall, and experiencing severe burnout, Dr. Kimble realized that working harder in a broken system isn't grit; it's a structural failure.

Determined to solve the problem at its core, he engineered **The Infinity Model**—a high-performance diagnostic framework that maps how friction moves across four critical pillars: Mind, Work, Body, and Home. He discovered that when a business stalls, the solution is rarely to grind harder—it's usually found backward in personal vitality or mental clarity.

Combining the stage presence of a performer with the tactical discipline of an executive, Dr. Kimble delivers keynotes and advisory sessions that dismantle traditional work-life balance myths. His energetic, direct style equips audiences with actionable frameworks to fix their friction, stop hiding in busywork, and build momentum that lasts.
