

Rieder

Matrix 3.0

The world's first CO₂-reduced glassfibre reinforced concrete

Rethinking
building skins

50% LESS
CEMENT

23% CO₂
SAVINGS

WITH NATURAL
POZZOLANS

On its way to climate neutrality, Rieder developed Matrix 3.0, a CO₂-neutral material for sustainable facade elements. 50% of the conventional cement was replaced by local natural pozzolana. The rock flour, which has been used in the construction of buildings since ancient times, has excellent properties in terms of structural density and hardening. The cement substitution allows a CO₂ reduction of 30% compared with Matrix 2.2 and a reduction of 23% for the facade elements.

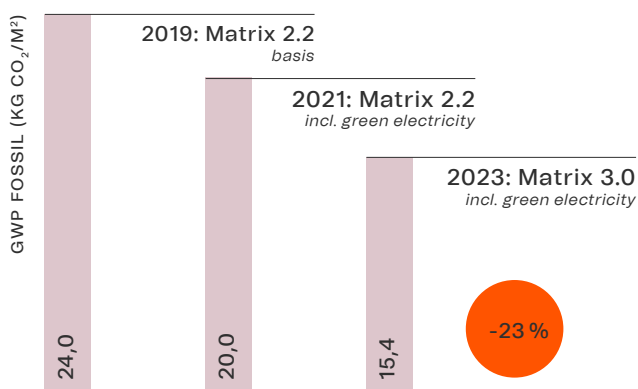

First implementation on the Rieder Campus in Maishofen

rieder.cc

Characteristics

MATERIAL	fibreC Matrix 3.0	CO ₂ -reduced concrete matrix: Replacement of 50% of the cement with natural pozzolans
	CO ₂ footprint	-30% CO ₂ versus Matrix 2.2, GWP fossil: 15.4 kg CO ₂ / m ²
	Production method	extrusion
	Reinforcement	glassfibre textile fabric approved by the building authorities
	Health standard	free of crystalline silica (< 1 M.-%)
PRODUCTS	concrete skin (large size)	1200 x 2500, 3100, 3600 x 13 mm
	öko skin (concrete slats)	147 x 1800 mm; 70 - 302 x 700 - 2500 x 13 mm
	formparts (formed elements)	max. length 3600 x 13 mm
VERSIONS	Colours phase 1	pine green, anthracite
	Colours phase 2	chrome, liquid black, terra, oak, walnut, ebony, terracotta, oxide red, burgundy, merlot
	Surfaces	ferro, ferro light, matt
	Textures	standard, slate (more on request)
PROPERTIES	Surface protection	without surface protection (hydrophobic coating on request)
	Dead load/weight per unit	26 - 31,5 kg / m ²
	Classification fire behaviour	A1 – non-combustible, A2-s1, d0 – non-combustible (EN 13501-1)
	Fastening visible	rivets, screws
	Fastening concealed	bonding, undercut anchor

Ecological indicators

Key figure	Unit	Cradle to Gate A1-A3
GWP Global warming	kg CO ₂	15,4
PENRT Non renewable energy	MJ/m ²	168,9
CO ₂ -savings cement	%	30
CO ₂ -savings panel	%	23
