

HS Code : 080410

Product Specifications :

- Product Type: Date paste
- Raw Material: Dates selected according to the intended product specification
- Texture & Consistency: Paste consistency suitable for food processing and ingredient applications
- Moisture Content: According to the required commercial specification and intended application
- Ingredients: Date-based formulation according to product requirements
- Processing: Prepared for use in food manufacturing and related applications

Season and Availability

Availability depends on raw material sourcing, processing schedules, and commercial demand, with supply arrangements suited to industrial and wholesale requirements.

Certifications & Compliance :

Applicable certifications and supporting documentation are provided according to product and destination-market requirements

Date Paste

Smooth Texture.

Ready for Processing.

Date paste is a processed date ingredient with a concentrated date flavor and a versatile texture suitable for various food manufacturing applications. It is used in bakery products, confectionery, snack bars, fillings, energy products, and other date-based food formulations.

Packaging

- Bulk bags, food-grade industrial packaging, export cartons, retail packs, and private-label formats.
- Packaging materials, net weights, and configurations can be selected according to handling requirements, intended use, and buyer preferences.

Shipping Conditions

- Dry container shipping under suitable conditions. Temperature-controlled shipping for hot destinations or extended transit periods, depending on product specifications.

Storage & Shelf Life

- Storage Temperature: 15–25°C in a cool, clean, and dry environment, with packaging kept tightly sealed.
- Shelf Life: Approximately 12–18 months, depending on processing, moisture content, packaging, and storage conditions.
