

Corporate Profile

Know Us Better

The blueprint for a successful integrated solution

In a world of uncertainty it pays to invest in security with a solid pedigree. Tyco's growing revenue over the last decade purely in security and fire with over 10% of the revenue reinvested in R&D makes a safe and secure investment for your company.

Tyco will be here when you need us most.

A holistic approach to protecting your investment

Delivering fire and security solutions on a global stage. Tyco is a market leader in the €80 billion global fire protection and security solutions industries. With over 50,000 employees who take great pride in knowing that they make a difference in the world helping to protect and safeguard people and property.

See how we are developing the latest fire protection and security solutions for more than three million customers around the world in a range of demanding environments.

Multiple Discipline Systems Integration

Tyco Security Products, a business unit of Johnson Controls, is a unified group of world-leading access control, video and intrusion brands. These brands – American Dynamics, Bentel, CEM Systems, DSC, Exacq, Kantech, Software House, Sur-Gard and Visonic – have more combined years of experience in the security industry than any other group in the world. Our security integration platforms, built by our developers from across all product disciplines, allow our customers to see more, do more, and save more. Our solutions today are designed to be compatible with the technology of tomorrow.

In more than 40 offices with more than 2,000 employees around the world, we support our global, local, and regional customers to the highest level with

sales, technical support and customer service before, during, and after the sale. Our world-class channel of dealers, integrators and distributors are trained to help customers with any complex problem in virtually any industry – retail, residential, gaming, transportation, healthcare, finance, education, government, POG to name but a few.

Pride in our products and service is what drives us. Our products backed by thousands of support, service and quality assurance personnel. And with the most trusted brands in security in one portfolio, we offer the most comprehensive range of premium solutions in the industry to our customers. An unbeatable combination from a single source.

Getting systems to integrate is difficult, keeping systems integrated as each discipline upgrades and advances is even more difficult and time consuming. Having all disciplines designed to work together under one company guarantees success and saves your time trawling between different manufacturers often competitors and overseas, in different time zones.

American Dynamics

SurGard

Visonic

DSC

Access Control & Event Management

Powerful world recognised brands in their own rite, designed to integrate and co-operate together and with other 3rd party systems.

Software House

Software House has established itself in the security industry as an innovator by being the first company to apply sophisticated database management software to access control and security management systems. At a time when most security companies focused on selling hardware, Software House identified and developed a market niche for sophisticated software-based computerised solutions to manage and integrate diverse security hardware devices.

CEM Systems

CEM Systems is a leading provider of access control and fully integrated security management systems. With over 25 years experience in the

security and IT industry, CEM uniquely manufactures both the AC2000 hardware and software, offering one of the most comprehensive, resilient and reliable systems available.

Kantech

Kantech designs, markets and supports integrated access control technologies that are ready to use right out of the box.

Kantechs full suite of access control products are reliable, easy to install and easily scalable and are readily available through a number of distribution outlets.

American Dynamics

American Dynamics CCTV and video technologies have earned a reputation for innovation, reliability and manufacturing excellence around the globe. Founded in the early 1970s in New York, they later merged with Robot Research Inc and together made pioneering breakthroughs in security technology. As testimony to this NASA, in the early 1970s, utilised video transmission technology designed by Robot Research to transmit the very first 'live' video from space.

Exacq

Exacq Technologies is a leading manufacturer of video management system (VMS) software and servers used for video surveillance. Known for its ease of use, the exacqVision cross-platform VMS software is widely used across many applications. It is readily available on factory installed exacqVision hybrid and IP camera servers or on commercial off-the-shelf servers.

illustra

illustra develops some of the industry's most technologically advanced IP cameras. Illustra is a diverse brand, catering to the IP camera needs of small business operators as well as providing superior quality cameras with advanced functionality for enterprise solutions. In addition to the small business market, the Illustra brand of IP cameras are ideal for use in the education market where it is important to deploy cost effective, yet high quality surveillance systems.

Video

Complete Video Systems Solutions including:

- Cameras – IP and Analogue
- Recording Systems
- Control & Display Solutions
- Monitoring Systems
- Intelligence & Analytics

Intrusion & Monitoring

DSC

DSC is a world leader in electronic security. From our revolutionary control panels, to our industry-leading IP alarm monitoring products and now to our sleek, contemporary self-contained wireless panels, DSC has always been front and center in the security space.

Visonic

Visonic is a world leading developer and manufacturer of high quality wireless intrusion alarm and safety systems and components. The company's dedication to innovation and its numerous technological breakthroughs over the past years have resulted in pioneering wireless security solutions.

Bentel Security

Bentel Security embodies a legacy of design and power exploiting newest technologies, the quest for perfection continues with a complete range of intrusion security, home automation and fire alarm control solutions. a leader in product design and manufacturing of a complete range of intrusion security alarm control equipment and accessories.

SurGard

Central Monitoring Stations worldwide have made Sur-Gard the brand of choice for alarm receiving equipment. This recognition comes from decades of experience in the engineering, manufacturing, service and support of central stations receivers. Sur-Gard is known as the number one brand for receiving equipment with numerous patents and awards for innovation and leadership giving it a strong competitive edge within the industry.

Research & Development

Tyco is a truly European centric organisation with a new centre of excellence in Cork, Ireland and our video European centre of excellence in Belfast, Northern Ireland. Our Belfast R&D facility has more than 250 engineers dedicated to developing the most advanced security products in the world today. The latest in a long line of innovations is victor, a unified video management solution that combines security, surveillance and event management into a single interface.
