PORTFOLIO UPDATE

For the week ended 18th September 2026, the fund NAV returned -0.20%, bringing returns since April 2026 to +0.35%. The sell-off was broad-based, driven by continued market volatility amid the Iran war, with Saudi Arabia, Mexico and India among the key country detractors. Sectorally, Financials was the largest detractor.

As widely anticipated, the Fed raised rates by 25 bps to 3.75%–4.00%, marking its first rate hike since July 2023.

Silverdale Bond Fund continues to be positioned conservatively, with 76% of its portfolio being high quality Investment Grade bonds with a short duration of 2.00 years, yet it has leveraged YTM (pre SGD-hedging) of 9.92% signalling higher potential returns in the coming months.
