Brief Information about our manufacturing process: -

Our Manufacturing unit is established away from the core city area to get enough work place and also enable the employees to concentrate to their work, as all our work needs concentration and deliberation. We have equipped our factory

PRODUCTS RANGE

with advanced and latest equipments and infrastructure, such as:-

- * Designing section has been outfitted with skilled designers having excellent talents in Photoshop, Auto CAD, Corel Draw, Adobe illustrator apart from natural arts talents.
- * Equipped with latest/updated computers, laser printers, scanners, cameras and other digital devices to meet all type design demanded by customers.
- * Equipped with Imported Machineries to ensure the quality and finishing of products. All our processes are highly mechanized.

Our In house integration has the following salient features: -

- * Innovation/Development of almost all customer demand.
- * Product design as per Innovation/Development.
- * Visual concept of developed design.
- * Pre-Production Sample prior to production.
- * Production Sample prior to Shipment.
- * 3D of Product to enable the customer to see the product as a whole.
- * Live Sample dispatch.
- * Execution of consignment.

All the above listed processes are entirely in house; we need not to go outside for any one of above as our factory equipped to meet all above requirements.

Our R&D Department has the following salient features: -

- * Mechanized design/development.
- * Import of any necessary Machinery or other relevant things.
- * Customized designing.
- * We have installed many Testing Equipments/Devices for the testing purpose. Although we have contact with SGS Laboratory to do all testing, which is not available in our factory premises.
- * Our Q.C. and Production Team are ensuring the quality and perfection of product at the every stage of production.

Guarantee/Warranty/After Sales Services

We provide Guarantee and Warranty as per product's nature and providing After Sales Service and also giving special consideration to our special customers in Prices, Early Delivery and other circumstances required demands.

Hans Raj Mahajan & Sons is a leading name in the sports goods manufacturing industry. And with a rich experience of 84 years, we have carved a niche for ourselves in the global sports goods market. Today, based on our experience, R&D, infrastructure and human resources, we have been successfully exporting our products to 50 countries across the globe and our clients include some of the most reputed brands.

While, we are an ISO 9001: 2000 certified company, following Total Quality Management (TQM) in our entire operations, the majority of our products have been approved by Many International Federation and have the CE marking for safety. Since, our Endeavour is to achieve total customer satisfaction through product innovation, consistent quality, unmatched services and competitive pricing; we are even more concerned about environment and society at large. At HRM, child labour is absolutely banned and we assure our clients that none of our products involve child labour at any stage of production.

Eco-friendly products and development

At HRM we are committed on make more and more eco-friendly products, we have developed for our clients more than 10-15 products in the last few years time which are selling very well Worldwide, we always welcome any suggestion / ideas from the client to make these products and can also develop any new product range for this

Packaging

We have a full fledged packaged unit backed by the latest machineries and experienced workforce. Prior to the shipping, all the products are packed with precision to ensure safe and prompt delivery at the client's destination. We use variety

PRODUCTS RANGE

materials such as wooden boxes, pallets, cardboard cartons and others based on the specific packaging requirements.

Different sports goods and equipment requires different methods of packaging. Our packaging professionals have worked with hundreds of companies through the years to determine the most appropriate packaging systems for individualized needs-while maximizing product protection and minimizing packaging costs. We offer customized packing solutions to fulfill needs of our worldwide customers.

Our team of skilled professionals review the products and requirements for packaging. The edge and the corner is covered with protectors to avoid any possible damage during the transit. We also closely review the environments in which the products are handled, shipped and distributed.

After the packaging of the products, the cartons are properly labeled with help of barcoding machines. The barcoding is used to identify the product in the box. It provide much more details of the packed product including dates, batch numbers, weight, quantity and dimensions.

R&D

Our R&D department plays a pivotal role in manufacturing high quality and durable sports goods. Our R&D department plans innovative ways to achieve the international quality and safety standards. Important factors like quality of raw material, durability, users' age and convenience, all weather conditions are deeply studied by our research faculty, as a requisite procedure prior launching a new product in the market.

Research and development has always been the cornerstone that has solidified HRM as the leader of the sport compact industry. In this step countless hours are spent handcrafting multiple prototypes with new level of performance. Once the prototypes are created they are then subjected to numerous tests before giving the final shape.

Apart from this, our R&D personnel continuously strive to upgrade the quality of our sport goods, so that they could successfully meet all the challenging opportunities and compete with sport goods of other major brands. For this purpose our research and development keeps a close watch over ever-changing technology to find out the innovative ways for the further improvement.

Infrastructure

Our state-of-the art infrastructure is spread over sprawling area of 50,000 sq. ft. The infrastructural unit has been broadly divided into two functional units. These units are backed by highly experienced workforce and latest technology capable of meeting all the requirements of the clients with precision. Our development managers and engineers evolve innovative design concepts creating a benchmark the industry in the field of sports goods.

Moreover, we consistently upgrade our technologies in order to meet the ever-changing requirement of the global customers.
