Acknowledgement

We would like to express its sincere appreciation to **What If Company Limited (WHAT IF)** for its valuable contribution to the design, development, and documentation of the Natural Capital Thailand online knowledge portal. The team gratefully acknowledges the professionalism, technical expertise, and dedication of the WHAT IF team throughout the website development process. Their continuous support, practical guidance, and close collaboration have been instrumental in the successful delivery of the online knowledge portal.

We also extends its sincere appreciation to the **Office of Natural Resources and Environmental Policy and Planning (ONEP)** for its valuable guidance, constructive feedback, and continued support throughout the development of the Natural Capital Thailand website.

Executive Summary

This report presents an overview of the Natural Capital Thailand website, an online knowledge portal developed under **Output 3.2.1: Develop, host and maintain an online knowledge portal** of the project *Integration of Natural Capital Accounting in Public and Private Sector Policy and Decision-Making for Sustainable Landscapes*. The portal serves as a central platform for sharing project information, knowledge hub, publications, and updates related to Natural Capital and Natural Capital Accounting (NCA) in Thailand.

The report outlines the current website structure, including the sitemap, main navigation, page descriptions, and technical information. It also includes a general user guide to help users navigate the website and access its content effectively.

The website brings together information on Natural Capital concepts, project implementation, project components, publications, case studies, and project news in a single platform. It serves as a knowledge-sharing platform that supports awareness-raising, stakeholder engagement, and networking to advance the mainstreaming of Natural Capital Accounting.

The **Natural Capital Thailand** web-based portal (<https://naturalcapital.care/>) was developed under **Output 3.2.1: Develop, host and maintain an online knowledge portal** of the project **Integration of Natural Capital Accounting in Public and Private Sector Policy and Decision-Making for Sustainable Landscapes**. The portal serves as the central platform for disseminating project information, knowledge resources, publications, and related updates. The website is available in both Thai and English to support national and international users and enhance accessibility to project information and knowledge resources.

The following section presents an overview of the current **Natural Capital Thailand** website, including its sitemap, main navigation, page descriptions, and technical information, such as programming Language, database, hosting environment, domain, SSL certificate, and database structure. This information serves as a reference for the continued development, maintenance, and enhancement of the online knowledge portal.

1. Website Sitemap

The following sitemap presents the current structure of the **Natural Capital Thailand website**, including its main navigation and key content sections.

The current website consists of seven primary navigation menus, providing users with access to the project's core information, knowledge resources, updates, and contact details.

- Home
