Introduction

PadhAI Evaluator is an AI-powered platform designed to transform the evaluation of UPSC Mains answers. By leveraging advanced technology, PadhAI Evaluator delivers faster, more accurate, and unbiased assessments tailored to UPSC grading standards. This whitepaper explores its key features, value propositions, and differentiation from competitors.

Value Proposition

PadhAI Evaluator addresses the pressing challenges faced by UPSC coaching institutes and educators by:
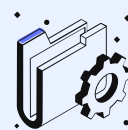

Eliminating manual errors

Reducing turnaround time

Lowering grading costs

Managing multiple answer copies efficiently

Offering transparency and customizability in grading

Streamlining the evaluation process

Target Audience

UPSC coaching institutes with limited resources for answer evaluation

UPSC educators aiming to scale their operations

# Supporting Statistics

1.4 million

Students appear for UPSC annually.

1,000 (approx.)

students per teacher (conservative estimate).

## 14,000 (approx.)

Teachers engage in UPSC preparation nationwide.

Key Features

Evaluation Quality

Evaluation Granularity

Workflow Optimization

Customizability

PadhAIEvaluator

1600 Shattuck Avenue, Suite 204, Berkeley, California, 94709

Key Features / Evaluation Quality

Unbiased Feedback

Adheres strictly to UPSC grading standards for impartial assessments.

Consistency Across Evaluations

Standardizes grading quality across all copies for the same question.

Advanced Diagram and Figure Analysis

Evaluates intricate diagrams and figures with AI precision.

Advanced Copy Understanding

Automatically identifies questions, answers, diagrams, and instructions without manual intervention.

Key Features / Evaluation Granularity

Targeted Improvement Suggestions
Highlights specific examples and topics for enhancement.

Direct Feedback on Answer Copies
Pinpoints problem areas directly on the answer sheet.

Categorized Feedback Levels
Prioritizes improvements into high, medium, and low categories.

Section-Wise and Overall Feedback
Offers detailed insights into both overall performance and specific sections.

Key Features / Workflow Optimization

Batch-Wide Grading Efficiency

Processes large volumes of answer copies within minutes.

Streamlined Workflow

Provides a unified platform for uploading, evaluating, and distributing graded copies.

Exportable Reports

Allows evaluations to be easily exported to PDF for seamless sharing.

Key Features / Customizability

Customizable Model Answers and Criteria

Input personalized model answers and grading rubrics.

Full Control for Teachers

Effortlessly modify grading rubrics and feedback.

Quick Onboarding

Leverage pre-optimized templates and rubrics for immediate use.

How Does PadhAI Evaluator Work?

01

Upload Answer Copy

Upload mains answer copies, GS papers, model answers, and custom grading instructions.

02

AI Analyzes answer

The AI analyzes each response with precision, adhering to UPSC grading standards, verifying facts, and identifying key improvement areas.

03

Get evaluated copy

Receive evaluated copies with actionable feedback, tailored improvement suggestions, and detailed section-wise insights, all while significantly reducing grading time and effort.
