

Eshan Hannsraj

UX & Product Designer

Interaction and product designer focused on reducing friction and supporting confident decision-making, designing experiences where clarity drives every choice.

PROJECTS

Fortnite Menu & HUD Redesign — UX/UI Game Optimization (June 2026)

- Introduced a Mode Selection button to the lobby screen, replacing an undiscoverable scroll gesture for new and returning players.
- Redesigned the mode selection menu, added clear visual hierarchy, and a hover interaction surfacing mode summaries, reducing time spent navigating.
- Designed two HUD additions for team play: a persistent builds counter for teammate materials, and a contextual loadout display tied to the player's inventory toggle.

Instagram DM Inbox Redesign — UX/UI App Optimization (March 2026)

- Improved inbox organization by introducing filtering (Unread, Groups, Favorites), helping users quickly navigate and prioritize conversations.
- Designed a swiping micro-interaction for key actions (read/unread, delete), improving efficiency in high-use workflows.
- Refined interactions to handle edge cases like delete confirmation, balancing speed with error prevention.

Metro Vancouver Resource Hub — UX Website Case Study (January 2026)

- Designed a website concept helping residents find food and housing resources quickly, without prior knowledge of the system.
- Structured layouts and service categories to support fast, confident decisions under stress, using availability indicators, filters, and clear calls to action.

GearUp — UX App Case Study (October 2025)

- Designed an app concept helping gamers browse and compare accessories, using progressive disclosure to present product info without overwhelming users.
- Built comparison flows that break a complex, multi-variable decision into a clear, manageable process.

EXPERIENCE

Freelance Game Playtester — PlaytestCloud (2021 - Present)

- Completed usability testing for games and unreleased features, evaluating interaction clarity, navigation, and player experience across diverse titles.
- Identified friction points and provided structured feedback with improvement suggestions, building a strong foundation in game UX evaluation.

Math & English Tutor — Kumon (June 2022 - Present)

- Guided students through step-by-step problem-solving, adjusting explanations based on individual learning needs.
- Identified where students struggled, iterated explanations to improve comprehension and confidence.
