Rates Structure, hourly, based on skills.

JUNIOR DEVELOPERS

$20-$30

Profile: Fresh graduates with real-world project experience through internships. Quickly adapt to technologies such as C#/.NET, the whole JavaScript ecosystem and database management.

Communication: Capable of basic English communication, improving project collaboration under the mentorship of more experienced developers.

Strengths: Quick learners with a foundational understanding of modern development practices.

Rate: $20 to $30 per hour, ideal for supporting roles in larger projects or tasks requiring basic technical proficiency.

Rates Structure, hourly, based on skills.

MID-LEVEL DEVELOPERS

$30-$45

Profile: Developers with significant experience capable of self-management and excellent teamwork. They bring good communication skills and a solid track record of independent problem-solving.

Experience: Boasting 3-5 years of development experience, they have a well-rounded understanding of software architecture and are adept with advanced technologies.

Skills: Mid-Level Developers demonstrate a range of technical proficiencies tailored to meet the dynamic needs of projects.

While not all are full-stack developers, their technical capabilities are complemented by a growing proficiency in analyzing requirements, contributing to technical documentation, and collaborating within agile development environments. Although they are building towards leadership roles, their current focus is on enhancing project teams with their technical skills and collaborative spirit.

Rate: $30 to $45 per hour, ideal for roles demanding specialized technical skills across a variety of development environments, with a focus on collaboration and project execution under senior direction.

Rates Structure, hourly, based on skills.

SENIOR DEVELOPERS

$45-$90

Profile: Highly skilled in managing complex development tasks, overseeing CI/CD processes, and crafting system architectures. They bring extensive CLOUD (AWS, Google, Azure) knowledge and are adept in both backend and frontend development.

Expertise: Beyond technical proficiency, they excel in strategic planning, mentorship, and leading development teams through the lifecycle of software development.

Technologies: Specialized in cutting-edge tools and frameworks such as AWS, Azure, Node, Deno, React, Next.js, Gatsby, React Native, Python, C, C++, Java, along with comprehensive testing and CI/CD strategies.

Rate: $45 to $90 per hour, perfect for leading development efforts on high-stakes projects, requiring deep technical knowledge and project management skills.

WORDPRESS DEVELOPMENT

$25-$70

Profile: A highly skilled WordPress developer with extensive experience in creating and customizing websites tailored to meet diverse client needs, from simple blogs to complex e-commerce platforms.

Experience: Proficient in WordPress development, with a strong background in theme and plugin customization, site optimization, and responsive design. Capable of managing projects end-to-end, ensuring functionality, usability, and performance across various devices.

Skills:
- In-depth knowledge of popular page builders like Elementor and WPBakery, as well as WooCommerce for e-commerce solutions.
- Familiar with SEO best practices and integration of analytics tools to enhance site visibility and performance.
- Strong problem-solving skills, with a focus on delivering user-friendly interfaces and seamless user experiences.

Rate: Contact us for a personalized quote based on your specific project needs, whether it's a straightforward website or a comprehensive e-commerce solution.

Rates Structure, hourly, based on skills.

UI/UX DESIGNER

$40-$70

Expertise: An authority in user experience and user interface design, our designer brings an expert level of proficiency in Framer and Figma. With a keen eye for design and user interaction, he excels at creating engaging, intuitive interfaces that enhance user satisfaction and drive product success.

Role: Responsible for translating client visions into tangible, user-centered design solutions. His work encompasses all phases of design from concept to final hand-off to engineering.

Rate: $40 to $70 per hour, offering top-tier design expertise to ensure products are not only functional but also visually appealing and user-friendly.

Rates Structure, hourly, based on skills.

QA ENGINEERS

$15-$40

Profile: QA Engineers proficient in both manual testing and automation, ensuring software quality and reliability.

Experience: Skilled in creating comprehensive test plans, executing test cases, and utilizing automated testing frameworks to streamline the QA process.

Technologies: Experienced with tools such as Selenium, JUnit, TestNG, Cypress, Appium, Postman, and Jenkins. Capable of identifying and documenting defects, and working closely with development teams to resolve issues.

Rate: $15 to $40 per hour, providing critical support in ensuring that software products meet the highest standards of quality before deployment.
