Details about Digigate “Flex”

“Automated loading and unloading”

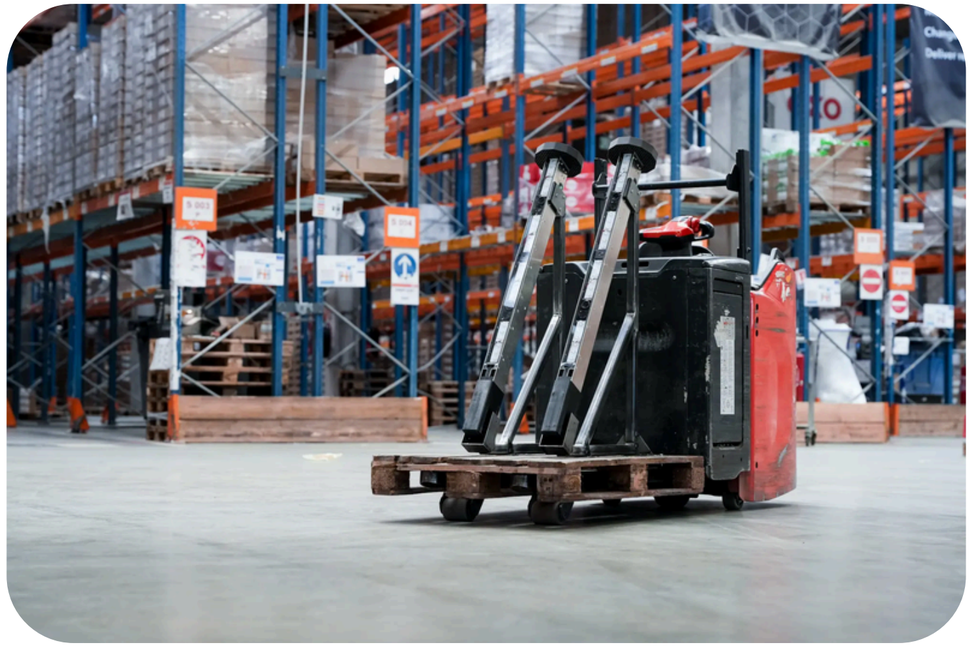

proprietary & confidential Digilo GmbH

Digigate Flex: what is it?

Based on the same technology platform used by our Digiscan® solution, Digigate Flex is the **only mobile scan gate solution on the market.**

Instead of equipping every loading bay of your warehouse with expensive scanning gates for loading and unloading, Digigate Flex allows you to only use the number of gates you need and move them from one loading dock to the next.

Digigate Flex in action

WATCH VIDEO

Digigate Flex in a nutshell

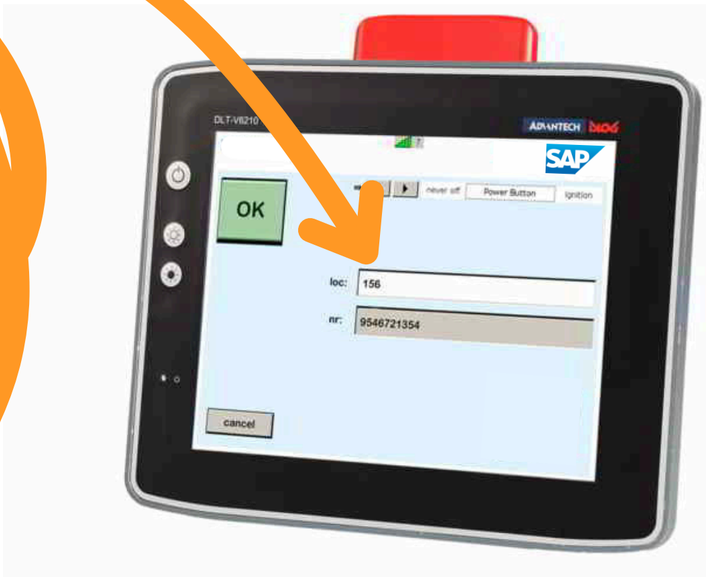

- High-speed mobile 1D/2D barcode scanning solution
- Battery powered or plugged (220V)
- Minimum barcode resolution of 20 mils (0,5 mm)
- Depth of field of 1400 mm at a code resolution of 0.5mm
- Plug & Play with any WMS/ERP thanks to Forklift Receiver Box
- Photos of scanned barcodes can be saved in dedicated software

Digigate Flex: Interface with WMS / ERP (Virtual Keyboard)

1) Digigate reads the codes and sends them wirelessly to the Receiver Box

2) The Receiver Box writes the pallet code and the gate number directly into your WMS/ERP like any normal barcode scanner via USB

Digigate Flex: 3 versions available

DF 100
Mobile Industrial 1D/2D barcode reader

- Designed for reading during loading and unloading
- 4 x 5MP camera
- 4 x 40W LEDs
- Reading range 100cm
- Battery life for 800 scans
- 80% battery recharge in 1h
- Weight: 8kg with battery

DF 150
Mobile Industrial 1D/2D barcode reader

- Designed for reading during loading and unloading.
- 6 x 5MP camera
- 6 x 40W LEDs
- Reading range 150cm
- Battery life for 600 scans
- 80% battery recharge in 1h
- Weight: 8.5kg with battery

DF 200
Mobile Industrial 1D/2D barcode reader

- Designed for reading during loading and unloading.
- 8 x 5MP camera
- 8 x 40W LEDs
- Reading range 200cm
- Battery life for 400 scans
- 80% battery recharge in 1h
- Weight: 10kg with battery
