Restriction evidence & information

This document details information and content relative to the restriction of the following offender

@ 945007726210203658

External connections

Information and links relative to the user, including usernames and external platforms.

- Nickname "harry"
- Discord username "aaez"
- Discord username "stxarua"
- Roblox ID 546993166
- Roblox username vqnisz
- Roblox alt account ID 2580453608
- Roblox alt account username "lqnisz", previously "ltzLxrenn", known as "Loren"

Known linked and/or associated Discord servers

- 1272323811391311874 (Known as Shift)

Known linked and/or associated Discord applications

- 1270449749572718623 (Shift) (Unverified)
- 1216114483605536869 (Utils) (Unverified)

Overview

Over the past two years, to our knowledge, Harry has been involved in a series of Discord server raids and “nuking” activities, primarily through the weaponization of his Discord bots. Reports of this behaviour first surfaced with the “Linkora” bot, which Harry used to target competitors or individuals he disliked. The bot, disguised as a service, was employed to raid communities, often with the intent of causing harm and disruption. Harry has openly shared his animosity and harmful intentions, particularly toward the Ro-School community.

Together, Harry and I (Julian) co-founded Alpyne, understanding that the group would operate as a subsidiary of Kybo. However, our partnership deteriorated due to disputes over decision-making, with Harry making significant changes without consulting others. By the end of our feud, Harry, alongside Lando, orchestrated a raid and the subsequent nuking of the Alpyne Discord server. Furthermore, Harry exploited his Roblox alt account, Loren, to exile all members of the Roblox Alpyne group, misusing his power to spread false messages and further damage the community.

harry 12/27/23, 1:39 AM

I usually work my way up
to slt
assistant headteacher
and then rank my alt dev
steal it
and then unrank

Julian SNOW 12/27/23, 1:39 AM

harry 12/27/23, 1:39 AM

and then raid the school
LOL
I love it

1:39 AM

I have some of the biggest schools
and some that nobody else has

Harry detailing how he'd orchestrate raiding servers

harry 12/27/23, 1:38 AM

I've stolen so many schools
I have a whole drive
most of them are high poly and smooth

Julian SNOW 12/27/23, 1:38 AM

HELP

harry 12/27/23, 1:38 AM

they have antilagd
I'll send

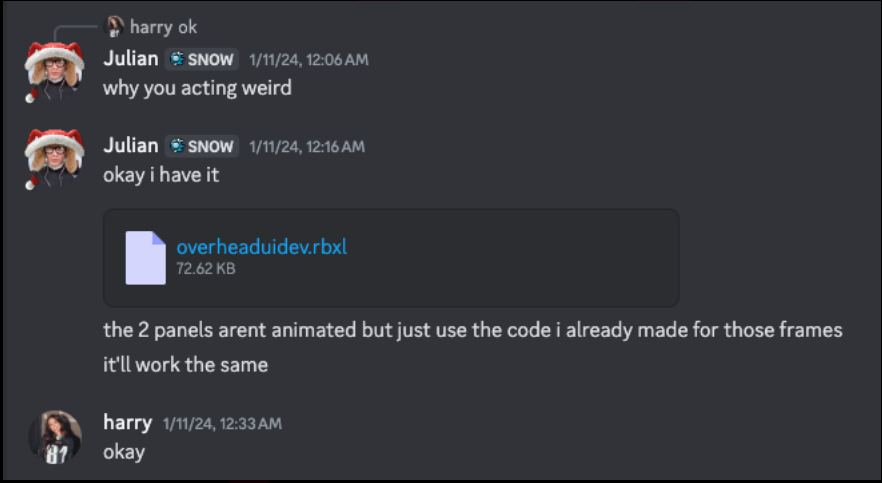

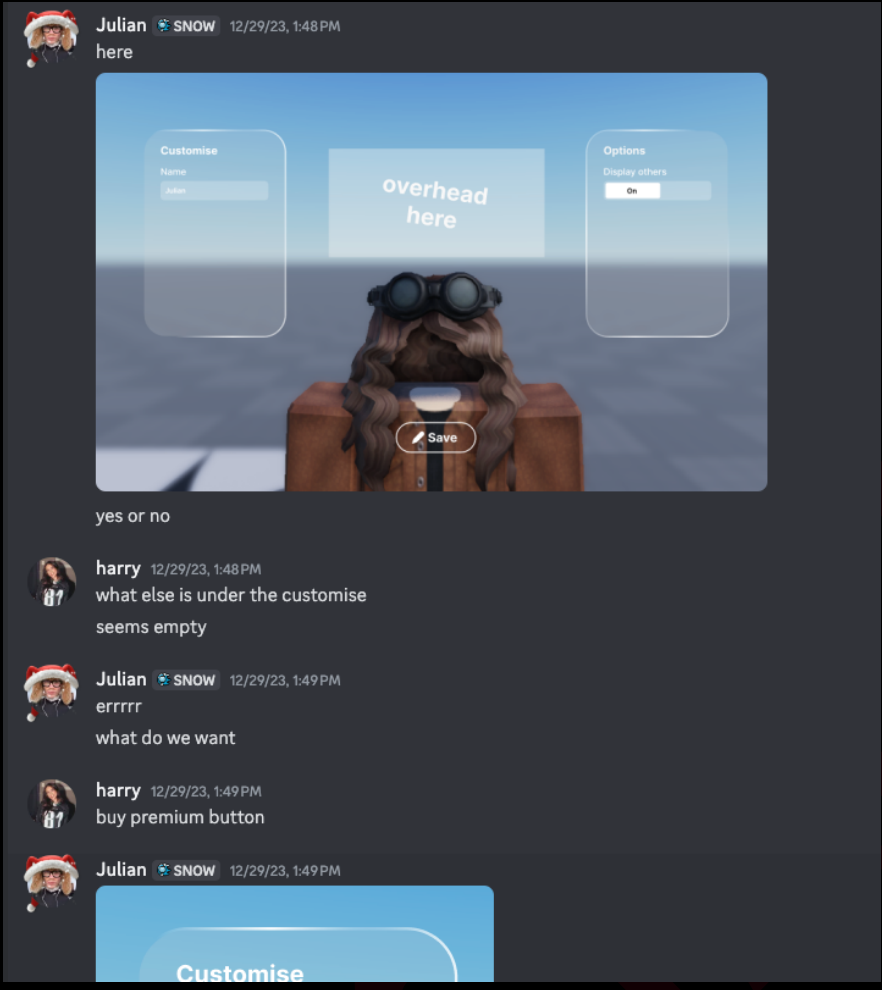

Harry expressing his role in stealing maps/assets from groups

"Loren" using automated botted code to kick all members from Alpyne.

Apr 27, 2024 10:36 PM	 loren Guest	loren created new version 767 of asset Alpyne Developer Playground
Apr 27, 2024 10:36 PM	 loren Guest	loren changed the community shout to "DM aaez for alpyne product source code - this is my group and not Julians. He has done nothing for Alpyne whatsoever apart from shout at me and Dior. 0 contributions. In fact, I did care about the community, Julian is lying. He is a manipulator."
Apr 27, 2024 10:36 PM	 loren Guest	loren changed the community shout to "DM aaez for alpyne product source code"
Apr 27, 2024 10:36 PM	 loren Guest	loren kicked user @vqnixsz

Harry, through "Loren", accusing myself (Julian) of not contributing to Alpyne. Dior was not staff for more than 24 hours.

Of course, my UI + code contribution. Not including development funding, bots (inducing server fees), graphics and more.

Source: private & unknown, obtained through publicly accessible channels.

Information status & course of actions

Most evidence regarding Harry's action has been removed through message deletion by Harry himself. Any further information received/collected will be updated within the file.

As of December 2024, Harry runs a Discord server named "Shift". There have been alleged discussions of misuse of the Shift bot to potentially raid servers. Apart from the excessive advertising found within channels, Shift will also be restricted.

All information has been backed with factual, unchanged screenshots of the raw messages and content unless censored.

We highly advise no one add any Discord applications created by Harry or any staff found within Shift and relative projects.
