

Payment Manager

Real-Time, Multi-Rail Payments Management

The secure, compliant, and flexible payment platform for banks, credit unions, and fintechs.

PORTX

What It Is

Payment Manager connects financial institutions to leading payment networks through a single, unified platform. With reusable APIs, configurable workflows, and built-in compliance capabilities, Payment Manager simplifies payment operations and strengthens real-time readiness. Institutions gain a flexible, multi-rail foundation that supports wires, FedNow, and emerging payment networks while accelerating the shift to fully modern, real-time payments.

Why it Matters for Financial Institutions

Multi-Rail Readiness.	Manage wires, FedNow, (ACH and VisaDirect coming soon), and additional payment rails as they become available.
Compliance-First.	Meet ISO 20022, PCI, SOC2, and FAPI standards with confidence.
Automated Workflows.	Configure rules for approvals, sanctions, and fraud prevention.
Real-Time Payments.	Transition seamlessly to instant payments, improving customer experience.
Embedded Finance Enablement.	Deliver fintech partnerships and BaaS offerings with ease.

What it Does

Streamlines Payments.

Connects directly to payment networks and cores with reusable APIs.

Customizes Workflows.

Tailor approvals, roles, and limits to your institution's needs.

Unifies Oversight.

Gain visibility with real-time monitoring, reporting, and alerts.

Supports Growth.

Scales efficiently with volume while lowering operational costs.

Key Features

Omni-Channel Processing.	API-first payments for wires, FedNow, and additional networks as they roll out.
Fine-Grained User Roles.	Assign permissions and controls by branch, role, or transaction type.
Observability Portal.	Full visibility into transactions with monitoring and audit capabilities.
Reusable APIs.	Speed deployment of new services with pre-built assets.
Flexible Architecture.	Independent of the core, extensible to fintechs and embedded finance use cases.
