

'MY LOCATION'

Viewing 'My Location'

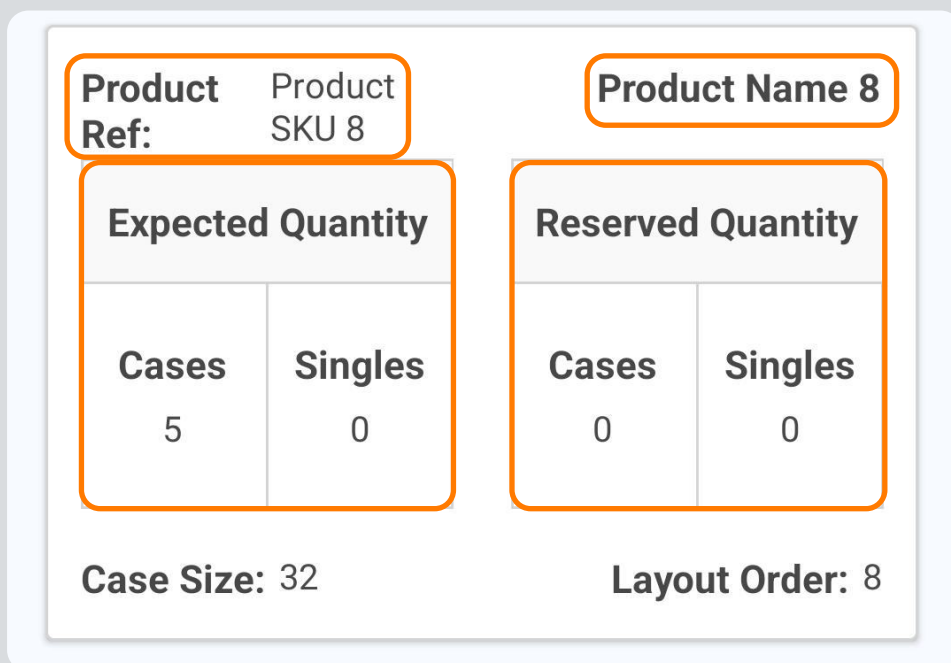

In **My Location**, you can view all products and parts assigned to your default location—whether it's a room, van, or warehouse—and check their current stock levels.

To switch between **Products** and **Parts**, use the toggle icon. If a category is empty, it means there are no items of that type in your location.

For each product, you can view:

- **Product Name** and **Reference**
- **Expected Quantity** and **Reserved Quantity**, displayed in both cases and singles.

In My Location, you can also see:

- **Case Size** of each product
- **Layout Order** position of the product
