EQUIPMENT

BULK	Current: 6, 7 L; Maximum: 13 Bulk
WORN	backpack, basic prosthesis, crossbow (20 bolts), dagger, minor healing potion (2), hide armor, +1 warhammer
STOWED	moderate ablative armor plating, basic crafter's book, bedroll, moderate blast boots, chalk (10 pieces), flint and steel, rations (2 weeks), repair kit (built into Whip), rope (50 feet), soap, thieves' toolkit (built into Whip), torch (5), waterskin
WEALTH	2 gp

WHAT IS AN INVENTOR?

You are someone with a brilliant mind capable of creating clever inventions. In combat you can deploy explosives, gadgets, other innovations, and, most notably, your intelligence to best your foes.

EQUIPMENT

The following rules apply to Drogen's equipment.

□ Ablative Armor Plating, Moderate (consumable) Ablative armor plating is additional plating, combined with springs, clever clockwork, and improvised padding, to absorb damage by knocking the additional pieces free. The pieces slowly come apart on their own with time and movement. The process of attaching the plating takes 10 minutes. The wearer gains 10 temporary Hit Points that last for 10 minutes or until lost. Removing the plating early destroys it.

Agile (trait) The multiple attack penalty you take on the second attack each round with this weapon is -4 instead of -5, and -8 instead of -10 on the third and any further attacks in the round.

Backpack A backpack can hold up to 4 Bulk worth of items. If you're carrying or stowing the pack rather than wearing it on your back, its Bulk is light instead of negligible. The first 2 Bulk of items stowed in your backpack do not count against your Bulk limits (and are not included in your worn Bulk).

□ Blast Boots, Moderate **◆** (consumable, manipulate) **Effect** These sets of rockets come in pairs and strap onto existing footwear (or a creature's feet). Inserting them and aligning them properly takes 1 minute. When you Activate the blast boots, you can High Jump or Long Jump, without the need to Stride first. When you Activate the moderate blast boots to High Jump, you can increase the vertical distance of your High Jump by up to 30 feet. When you Activate them to Long Jump, you can increase the horizontal distance of your Long Jump by up to 45 feet.

Finesse (trait) You can use your Dexterity modifier instead of your Strength modifier on attack rolls using this melee weapon. You still calculate damage using Strength.

□□ Healing Potion, Minor (consumable, healing, magical, potion, vitality) **Usage** held in 1 hand; **Activate** **◆** (manipulate); **Effect** Upon drinking this potion you regain 1d8 Hit Points.

Repair Toolkit A repair toolkit allows you to perform simple repairs while traveling. It contains a portable anvil, tongs, woodworking tools, a whetstone, and oils for conditioning leather and wood. You can use a repair toolkit to Repair items using the Crafting skill.

Shove (trait) You can use this weapon to Shove with the Athletics skill even if you don't have a free hand. This uses the weapon's reach (if different from your own) and adds the weapon's item bonus to attack rolls as an item bonus to the Athletics check. If you critically fail a check to Shove using the weapon, you can drop the weapon to take the effects of a failure instead of a critical failure.

Thieves' Toolkit You need a thieves' toolkit to Pick Locks or Disable Devices (of some types) using the Thievery skill. If your thieves' toolkit is broken, you can repair it by replacing the lock picks with replacement picks appropriate to your toolkit; this doesn't require using the Repair action.

Thrown (trait) You can throw this weapon as a ranged attack. A thrown weapon adds your Strength modifier to damage just like a melee weapon does. When this trait appears on a melee weapon, it also includes the range increment in feet.

Versatile (trait) A versatile weapon can be used to deal a different type of damage than its listed type. This trait indicates the alternate damage type. For instance, a piercing weapon with versatile S can deal piercing or slashing damage. You choose the damage type each time you attack.

Drogen's feats and abilities are described below.

Innovation Drogen's innovation is his construct companion Whirp.

You know how to spend additional time directing, controlling, or programming your construct innovation for a more complex plan of action. You can spend 2 actions to Command instead of 1 when commanding your construct companion; your construct companion can then use an additional action (normally 3 actions, rather than 2). If your innovation is destroyed, you can spend 1 day of downtime and attempt a Crafting check with a high DC for your level (DC 20 for 3rd level); on a success, you rebuild it. An innovation only works due to your constant maintenance and tinkering, and therefore has no market Price.

Built-In Tools You've built tools into your innovation so you can access and use them easily. You have built your thieves' toolkit and your repair kit into Whirp. As long as you are adjacent to Whirp, you have the same quick access to these tools as the tools you are wearing, and they don't count against the usual limit of tools you can wear.

Explode **◆◆** (fire, manipulate, unstable) You intentionally take your innovation beyond normal safety limits, making it explode and damage nearby creatures without damaging the innovation... hopefully. The explosion deals 3d6 fire damage with a basic Reflex (DC 19) save to all creatures in a 5-foot emanation around Whirp.

Explosive Leap **◆◆** (fire, move, unstable) You aim an explosion from your innovation downward to launch yourself into the air. You jump up to 30 feet in any direction without touching the ground. You must land on a space of solid ground, or else you fall after using your next action. As normal for effects where you fall after using your next action, you still fall at the end of your turn, even if you don't use any further actions that turn.

Special Whirp can take this action rather than you.

Low-Light Vision You can see in dim light as though it were bright light, and you ignore the concealed condition due to dim light.

Overdrive **◆** (manipulate) **Frequency** once per round; **Effect** Temporarily cranking the gizmos on your body into overdrive, you try to add greater power to your attacks. Attempt a Crafting check that has a standard DC for your level (DC 18 for 3rd level).

Critical Success Your gizmos go into a state of incredible efficiency called critical overdrive, adding great power to your attacks. Your Strikes deal additional damage equal to your Intelligence modifier plus 1 for 1 minute. After the Overdrive ends, your gizmos become unusable as they cool down or reset, and you can't use Overdrive for 1 minute.

Success Your gizmos go into overdrive, adding power to your attacks. As critical success, except the additional damage is equal to half your Intelligence modifier plus 1.

Failure Your gizmos whine concerningly and begin to smoke. Your Strikes deal 1 additional fire damage.

Critical Failure Whoops! Something explodes. You take fire damage equal to half your level (rounded up), and you can't use Overdrive again for 1d4 rounds as your gizmos reset.

Special When under the effects of Overdrive, you can still use the Overdrive action. You can't extend your Overdrive's duration this way, but you can turn an overdrive into a critical overdrive if you critically succeed. A failure has no effect on your current Overdrive, and you end your Overdrive on a critical failure.

Commanded that turn to take the action. If you critically fail the flat check, the minion takes the damage instead of you.

Searing Restoration ♦ (fire, healing, manipulate, unstable) They told you there was no way that explosions could heal people, but they were fools... Fools who didn't understand your brilliance! You create a minor explosion from your innovation, altering the combustion to cauterize wounds using vaporized medicinal herbs. You or a living creature adjacent to you regains 2d10 Hit Points. In addition, the creature you heal can attempt an immediate flat check to recover from a single source of persistent bleed damage, with the DC reduction from appropriate assistance.

Special Whirp can take this action rather than you, though because it's not a living creature, it can't use the ability on itself.

Specialty Crafting Your training focused on Crafting one particular kind of item. You gain a +1 circumstance bonus to Crafting checks to Craft items related to blacksmithing. If it's unclear whether the specialty applies, the GM decides.

Toughness Your body can withstand more punishment than most before succumbing. Increase your maximum Hit Points by your level. You reduce the DC of recovery checks by 1.

Trick Magic Item ♦ (manipulate) You examine a magic item you normally couldn't use in an effort to fool it and activate it temporarily. For example, this might allow a fighter to cast a spell from a wand or allow a wizard to cast a spell that's not on the arcane list using a scroll. You must know what activating the item does, or you can't attempt to trick it.

Attempt a check using the skill matching the item's magic tradition, or matching a tradition that has the spell on its list, if you're trying to cast a spell from the item. The relevant skills are Arcana for arcane, Nature for primal, Occultism for occult, Religion for divine, or any of the four for an item that has the magical trait and not a tradition trait. The GM determines the DC based on the item's level (possibly adjusted depending on the item or situation).

If you activate a magic item that requires a spell attack modifier or spell DC and you don't have the ability to cast spells of the relevant tradition, use your level as your proficiency bonus and the highest of your Intelligence, Wisdom, or Charisma modifiers (modifier +7, DC 17 at 3rd level).

Success For the rest of the current turn, you can spend actions to activate the item as if you could normally use it.

Failure You can't use the item or try to trick it again this turn, but you can try again on subsequent turns.

Critical Failure You can't use the item, and you can't try to trick it again until your next daily preparations.

Unstable (trait) Unstable actions are experimental applications of your innovation that even you can't fully predict. When you take an unstable action, attempt a DC 15 flat check immediately after applying its effects. On a failure, the innovation malfunctions in a spectacular (though harmless) fashion, such as a belch of smoke or shower of sparks, and it becomes incapable of being used for further unstable actions. On a critical failure, you also take an amount of fire damage equal to half your level. You can spend 10 minutes retuning your innovation and making adjustments to return it to functionality, at which point you can use unstable actions with that innovation again.

To take an unstable action, you must be using your innovation (for example, wearing an armor innovation or wielding a weapon innovation). If you have a minion innovation, some unstable actions are taken by the minion instead of you. In these cases, only the minion can take that action, and the minion needs to have been

SUPPORT BENEFIT AND ABILITIES

CONSTRUCT

Whirp is a construct and doesn't need to eat or breathe. Because a construct isn't a living creature, effects that heal living creatures can't help it recover Hit Points. Restoring Hit Points to Whirp requires using the Repair action or other means that can restore Hit Points to objects and nonliving creatures.

When Whirp reaches 0 Hit Points, it becomes broken and begins sparking and might be destroyed if you don't Repair it. This works the same as the normal dying rules and determines if your construct is destroyed, with the following two changes. First, most effects that end the dying condition don't work to save a construct companion, but a construct can be stabilized using the Administer First Aid action, using the Crafting skill instead of Medicine. Second, instead of gaining and tracking the wounded condition, if your construct becomes broken in this way more than twice within a 10-minute period, it's destroyed, and you'll need to reconstruct it by spending a day of downtime.

IMMUNITIES

bleed, death effects, disease, doomed, drained, fatigued, healing, nonlethal attacks, paralyzed, poison, sickened, unconscious, vitality, and void

MANUAL DEXTERITY

Whirp has articulated hands or similar appendages with significant manual dexterity. Whirp can perform manipulate actions with up to two of its limbs. As normal for a companion, it still can't wield weapons or held items that don't have the companion trait, and it can't activate items.

SENSES

Your construct companion has precise vision, imprecise hearing, and vague touch senses, but no sense of smell or taste.
