RISK PROFILE

NAV per share will fluctuate, and any capital invested is subject to risk, including loss of the principal amount invested. The Fund uses leverage and derivatives for both hedging and investment purposes, which amplify returns, including loss (if any) and entail additional costs, volatility, and counterparty risks. Please refer to the Offering Documents for further details.

PORTFOLIO UPDATE

During May 2026, the Fund's NAV appreciated by 1.36%, bringing year-to-date returns to 4.64%, notwithstanding elevated macro volatility.

Recent mark-to-market movements were primarily driven by geopolitical developments involving Iran, while underlying portfolio credit quality remains robust with no credit-specific concerns identified and adequate headroom maintained across all positions

The portfolio is well diversified across high-quality holdings with less than 5% exposure to Middle East. The Target Return Fund structure provides an inherent and progressive resilience: the declining maturity profile naturally reduces duration and spread sensitivity over time, independent of interim market dislocations.

HOW TO INVEST

Please ask your private bank/distributor to subscribe to Silverdale Target Return Fund October 2028 as per terms of the Offering Documents (quoting the relevant ISIN).
