

TECHNICAL CURRICULUM

PAINTING & DECORATING · FULL-TIME

PAINTING & DECORATING

A complete, practice-based training programme for new build, renovation and decoration.

Real surfaces, real coatings, market-ready quality.

THE PROGRAMME

A good surface is no accident. This programme builds the skill for it, from substrate to handover.

Painting & Decorating is a practice-based, full-time programme for new build, renovation and decoration.

Across twenty specialist modules, trainees work their way from the substrate through coating materials, application and spray technique to facade, varnish, decorative design and handover.

The focus is on practice throughout. Learning takes place on real substrates, with real coating materials and real equipment, with around 1.400 hours of practical learning and over 100 assessed exercises.

Every module concludes with an assessed exam piece, so that competence shows in real work and not on paper. Occupational safety, hazardous-material and environmental protection run as a cross-cutting theme through all modules.

The programme is offered as a curriculum, as a matching equipment specification, or as a turnkey package for the site.

Capstone Project

COMPLETION

EQUIPMENT

Trained on wall and equipment.

01

Hand & Application Tools

Brushes, rollers and roller systems, spatulas, smoothing trowels and wallpapering tools.

02

Substrate & Filling

Sanders, wire brushes, hot-air and stripping devices, plus Q-fillers and drywall sanders.

03

Spray & Airless Technique

Airless sprayer, cup guns, compressor, hoses and nozzles.

04

Mixing, Measuring & Testing

Stirrer, paint mixing scale, coating-thickness and moisture meter, RAL/NCS colour fans.

05

Access Equipment & PPE

Ladders, mobile scaffolds and work platforms, plus respiratory protection and extraction.

06

Workshop & Training Media

Workbenches, material shelving, hazardous-material store, cleaning station, plus practice walls and sample boards.
