INFORMATION TECHNOLOGY

Where Security Meets Facilitation

INTRODUCTION

WELCOME TO SOMAPA INFORMATION TECHNOLOGY.

Established in 1995, **SomapaIT** was founded with a dual mission: to enhance border security and contribute to Thailand's economic development. The company's initial project in 1998, developing Thailand's border control system, realised this objective and set the stage for our future within the industry.

By 2002, **SomapaIT** had expanded Thailand's border control system to cover all major entry points. The introduction of the Advance Passenger Information System in 2004 further evidenced the company's reputation as a pioneer in border management technology. During this period, we expanded **SomapaIT** solutions to include advanced control centres and customised solutions for the Thai Departments of Transport and Energy.

In 2012, **SomapaIT** became a public company. The launch of the Advance Passenger Processing System in 2015 accelerated the company's growth, paving the way for the introduction of similar systems in the Laos People's Democratic Republic in 2019 and the Thai Passenger Name Record and Flight Permit Systems in 2020.

Now known as the **Somapa Group of Companies**, we have matured into a global enterprise with a truly international presence. This evolution reflects our commitment to meeting the diverse needs of markets worldwide. Under the banner of "Breaking Through the Global," **SomapaIT** is celebrating thirty years of operation and pursuing an ambitious agenda to bring advanced border solutions worldwide.

Our approach is deeply rooted in our Thai heritage of service, which remains the foundation of all our endeavours as we venture into global markets. Looking forward, **SomapaIT** is dedicated to setting new benchmarks in border security by building on our legacy of excellence. Our flagship initiative, Smart Border Solutions, showcases our commitment to innovation with its unique modular design, providing adaptability

and scalability tailored to the diverse needs of our global partners.

With thirty years of experience, **SomapaIT** is a beacon of innovation, expertise, and unwavering commitment to service excellence in the border management industry. Our vision is to be the global leader in innovative border management solutions. As international travel continues to evolve, **SomapaIT** is the trusted partner in realising the full potential and value of national borders through uncompromising security and enhanced travel facilitation.

Join us as we are "**Breaking Through the Global**" and bringing the security, facilitation and service for which **SomapaIT** is renowned to the borders of the world...

VISION

To be the global leader
in innovative border
management solutions.

MISSION

To deliver cutting-edge border management technologies and solutions that set global standards for security, efficiency, and facilitation. Through collaboration and expertise, we empower our partners worldwide to achieve their border modernisation goals with confidence and trust.

ACHIEVEMENTS

1995

- Founded

2004-2006

- Implemented the Advance Passenger Information System (APIS) pilot project

- Implemented PISCES border control system and integrated with E-Gate system

1996-2003

- Developed a border control system and expanded to all primary points of entry into Thailand

- Certified as a Thai Quality Software Producer

2007-2011

- Developed the capturing and tracking system for the Ministry of Energy

- Set up command centre for traffic information for the Ministry of Transport

- Became a public company limited

2020-2024

- Developed Flight Permit Online System (FPOS) for Civil Aviation Authority of Thailand

- Implemented an interactive Advance Passenger Processing System (APPS), and Passenger Name Record (PNR) for Airports of Thailand

- Implemented PNR Push for Thai Airways International (TG)

2013-2019

- Implemented an interactive Advance Passenger Processing System (APPS) for Thailand

- ISO/IEC 27001 certified (Information Security Management)

- Implemented an Advance Passenger Processing System (APPS) and Passenger Name Records (PNR) for the Lao People's Democratic Republic

TOMORROW

- Delivering on our mission to bring cutting-edge border management technologies to the world and "Breaking Through the Global"

SMART BORDER SOLUTIONS

At SomapaIT, our commitment to excellence and innovation is embodied in our flagship initiative, Smart Border Solutions.

Building on SomapaIT's thirty-year legacy and leveraging our deep heritage of service, we are pioneering the next generation of border control. Smart Border Solutions encapsulates a holistic approach to border security and efficiency, integrating state-of-the-art technologies with our core principles of innovation and expertise.

THIS COMPREHENSIVE SOLUTION INCORPORATES:

SMART BRAIN

Utilising AI-driven analytics for precise risk assessments.

SMART INTEGRATION

Seamlessly connecting new and existing technological systems.

SMART OPERATIONS

Enhancing operational efficiency through advanced automation.

SMART SECURITY

Fortifying and protecting digital assets and sensitive data.

SMART BRAIN

SMART INTEGRATION

SMART OPERATIONS

SMART SECURITY

Together, these elements form a robust framework that sets new benchmarks in border management. Smart Border Solutions' innovative modules comprehensively cover sea, land, and air borders, delivering unprecedented security and efficiency. They combine to create a multi-layered security and facilitation strategy that enables pre-travel, pre-arrival, arrival, in-country, and departure assessments and interdictions.

Smart Border Solutions modular solutions range from interactive Advance Passenger Information (iAPI) and Passenger Name Record (PNR) systems to a comprehensive suite of services, which include domestic track and trace, intelligent risk profiling, advanced biometric analysis, and smart gate technology.

Smart Border Solutions creates a multi-layered response to mitigate security risks and facilitate safer, smoother global travel by modernising and managing borders with detailed precision.

PHILOSOPHY & CULTURE

Emphasising Service, Innovation, Expertise, and Collaboration

SomapaIT's foundational values of service, innovation, and expertise are complemented by a deep commitment to collaboration and cooperation.

This comprehensive approach shapes our organisational culture and directs our interactions with partners, ensuring that our technological solutions and services meet current needs and adapt to future challenges.

SERVICE

Our service philosophy extends beyond delivering solutions; it involves building trusting and respectful relationships with each partner.

We listen to their needs and challenges, adapting our approach to provide bespoke services that enhance border security and operational efficiency.

This commitment to service fosters a supportive environment where partners feel valued and understood.

EXPERTISE

Expertise at SomapaIT is not just about what we know; it's about how we grow through our interactions. We value the expertise of our partners as much as our own, recognising that collaboration leads to a richer pool of knowledge.

This mutual exchange of expertise enhances our ability to innovate. It serves as a cornerstone of our consulting services, ensuring that we offer advice informed by a broad spectrum of international perspectives and practices.

INNOVATION

Central to our mission is a relentless pursuit of innovation. We encourage our teams to explore new ideas and technologies, leading to pioneering solutions like our Smart Border Solutions.

These innovations are not developed in isolation; they result from collaborative efforts that combine our insights with the first-hand experiences of our partners.

This synergy fuels creative solutions and ensures that our technologies are practical and effective in diverse environments.

COLLABORATION & COOPERATION

By strongly emphasising partnership and cooperation, we create a culture where knowledge and skills are shared openly. This approach not only enhances our own expertise but also respects and leverages the capabilities of our partners. By working together, we develop technically sound solutions that align culturally and operationally with the specific needs of the partners we serve. Our collaborative projects lead to shared successes that advance the field of border management globally.

Through these interwoven principles of service, innovation, expertise, and collaboration, SomapaIT fosters a dynamic environment that nurtures long-term partnerships and leads to ground-breaking advancements in border technology. Our philosophy ensures that we are not just vendors but trusted partners, jointly navigating the complexities of global border management.

BREAKING THROUGH THE GLOBAL

**Celebrating 30 Years
Of Excellence,**

SomapaIT is steadfast in our vision: to be the global leader in innovative border management solutions, renowned for relentless innovation and profound expertise. Under the banner "Breaking Through the Global," we are forging new paths and relationships, committed to extending cutting-edge border management technologies to countries worldwide. Leveraging the experience and understanding gained from our longevity, we continue to set new standards and expand our global presence.
