

Hi everyone! My name is Vaibhav and I am pursuing Industrial Designing at Doon University, Uttarakhand. My design inspiration stems from everyday objects and making them user friendly while maintaining the aesthetics and ergonomics. Through my years at design school I have learned how to accommodate the user needs into the product that intrigues and fascinates them. I wanted to look into other alternative design careers, and UX appears to be a good one to pursue. I want to apply my creativity in the digital realm to help produce a simple and enjoyable experience for users when they use applications, websites, and so on.

VAIBHAV JOSHI

UI/UX DESIGNER
