AI Implementation For Your Business

June 25, 2026

Canary Wharf, London

01 // THE PARTNERSHIP

Intelligence Briefing

OPERATIONALIZING INTELLIGENCE

The infrastructure has been built. The focus now shifts to execution.

The Raion x Daemon partnership bridges the critical gap between sovereign AI compute and enterprise-scale deployment. While Raion curates the absolute apex of founders, hyperscalers, and capital allocators, Daemon provides the technical architecture to integrate these breakthroughs directly into your operational workflow.

This is where asymmetric compute power meets practical business implementation. Signal over noise, translated into measurable market advantage.

02 // THE IMPLEMENTATION LAYER

Daemon

Deep Expertise, Amplified by AI.

We stand at the intersection of craft and code. We bring the heavyweight experience of having been there, seen it, and done it. We do not just rely on the past—we use AI as a force multiplier to secure your future. We do more than build technology. We amplify capability.

2025 EMEA AWS INNOVATION PARTNER OF THE YEAR

Recognized on a global stage. Daemon's proprietary AI solution cut enterprise research time in half, cementing our position at the forefront of AI-first engineering.

AI-First Engineering

Evolve your SDLC. Daemon's dedicated AI-first squads cut through the noise, delivering high-impact technological transformations across your organization with unprecedented velocity.

- Technology Innovation
- Technology Modernisation

Commitment to Sustainable Excellence

Beyond technology, we are actively mapping a path to Net-Zero by 2030, aligned with the Climate Pledge. We deploy our technical expertise for global impact, engaging in pro-bono partnerships with institutions like the National Oceanographic Centre to drive sustainable global change.

03 // COMMENDATION

The Raion Prize

Recognizing the Architects of Asymmetric Outcomes.

The Raion Prize is an exclusive commendation awarded to the rare individuals shaping the next decade of sovereign AI. It honors founders, builders, and capital allocators who have transcended theoretical limits to execute physical, high-impact infrastructure and intelligence solutions.

Not an industry award. A benchmark of uncompromising execution.

The Delegates

Jonathan Loretto

NED & Board Advisor

With over 25 years in global consulting, Jonathan orchestrates major digital transformations and post-merger integrations across telecommunications, banking, and private equity. He drives rapid change and shareholder value in complex, highly competitive environments.

line|group

Mark Okes-Voysey

CEO, Line Group Limited

An international executive and board member leveraging deep expertise in M&A, audit, and corporate governance. Mark provides strategic oversight for companies navigating complex multi-jurisdictional growth, wealth management, and structural transformation.

 Microsoft

Marcus Vinicius Martinez

Financial Services Industry Advocate, Microsoft

A trusted catalyst in the financial sector with over 20 years of experience. Marcus leads tier-1 institutions through regulatory change, risk management, and the high-stakes adoption of cloud architecture and artificial intelligence at scale.

 Simudyne

Justin Lyon

CEO, Simudyne

Applying advanced AI and simulation technology to solve hyper-complex problems. Justin's platform builds agent-based digital twins, allowing government, military, and corporate leaders to predict outcomes and turn raw insight into tactical foresight.

Imperial College
London

Hugo Barker

Science and Technology Lead, New Diplomacy Project

Bridging the gap between sovereign technology and progressive foreign policy. Operating alongside Imperial College and Chatham House, Hugo structures the geopolitical dialogue surrounding high-stakes AI and defense infrastructure.

CVC CAPITAL
PARTNERS

Andy Archer

Chief Technology Officer, CVC Credit

Executing high-level technical strategies within the elite investment management space. Andy brings deep domain expertise in quantitative risk management, hedge fund infrastructure, and institutional asset management.

intellect
live your dream

Abhishek Joneja

Strategic Alliances, Fintech & Banking

A growth leader with over 20 years in banking and fintech. Formerly leading enterprise sales at Citibank, Abhishek now drives go-to-market strategies and partner-led revenue across top-tier cloud, consulting, and system integration ecosystems.

nvidia

Beth Robinson

Sales Enablement Manager EMEA, NVIDIA

Positioned at the epicenter of the AI hardware revolution. Beth drives regional strategic enablement for NVIDIA, accelerating the deployment of the GPU compute infrastructure that powers the modern artificial intelligence economy.

Waseem Shiraz

VP Special Projects, Quantinuum

Driving innovation at the bleeding edge of quantum computing and AI. Waseem accelerates breakthroughs across energy, cybersecurity, and climate, translating massive computational power into industry-defining physical realities.

George Dunlop

Co-founder & Dir of Partnerships, Quantum Dice

Pioneering the commercialization of provable quantum randomness. Spun out of the University of Oxford, George's work harnesses the fundamental quantum properties of light to enable secure, uncrackable encryption for next-generation computing architectures.

Dwarika Patro

Founder & COO, Aays Analytics

A technology strategist architecting digital transformation for Fortune 1000 clients. Dwarika builds the critical data science and AI capabilities required for blue-chip companies to secure their future market positions and optimize technical investments.

INITIATE

Execute the Transformation.

The intersection of infrastructure and intelligence dictates the next decade of market dominance. Partner with Raion and Daemon to engineer your asymmetric advantage and deploy sovereign AI architectures at hyperscale.
