\$ZONE WHITEPAPER

ZB Group LLC

1. Introduction

Zonebit.com is the world's first culture casino, fully licensed and managed by a doxxed team of builders focused on revolutionizing the crypto casino industry by merging trading and gaming.

What is a culture casino? It's a casino that focuses on empowering its community rather than limiting them. It's a casino that invests back into the community. It's a casino powered by the culture that moves the crypto and gaming space forward.

\$ZONE, the governance token powering Zonebit.com, powered by the Solana blockchain, offers a seamless, fast, and secure experience for its users. With a total supply of 1 billion tokens and no buy/sell tax, we aim to be the most innovative crypto casino in the world, merging trading and gaming in unique ways while fully bringing both worlds together before anyone else.

Ticker: \$ZONE (SPL Token on Solana Blockchain)

LP: 100% Burned (Zonebit team will add and burn the LP)

Total Supply: 1,000,000,000

Buy/Sell Tax: 0%

Mint/Freeze Authority: Disabled

\$ZONE is designed to provide governance and utility within the Zonebit platform, ensuring that users have a voice in the future development and direction of the ecosystem. As a governance token, \$ZONE allows holders to participate in key decision-making processes, enhancing the decentralized nature of Zonebit.

If staked, \$ZONE holders will benefit from increased rakeback on zonebit.com and participate in the \$ZONE pool, where the community of players and the holders will be rewarded through various mechanisms, challenges, and competitions. More details can be found below.

2. Mission and Vision

Mission: To empower holders with a token that ensures their voices are heard in shaping the future of Zonebit, fostering a transparent, fair, and engaging environment for all participants. Our mission extends to promoting culture and community engagement, making Zonebit a hub for Solana's cultural expression and creativity and beyond. Zonebit is **a fully licensed casino** with thousands of games, slots, live casinos, sports betting, and in-house original games.

Vision: *To create a culture-focused and community-driven platform that seamlessly integrates trading and gaming, providing users with a unique and innovative experience worldwide. As the first culture casino of Solana (and any blockchain), we aim to give back to the community on a scale you haven't seen before, supporting memes and the only meta that will never die: the culture itself. Our goal is to be the only casino that thrives on this unique approach, bridging the gap between casinos and the crypto culture.*

2. Overview

Our website, Zonebit.com, will launch in a Beta version prior to the \$ZONE token launch. It will have thousands of casino games, including slots, live casino, virtual betting, sports betting, and original in-house games. During the launch of Zonebit.com, we will introduce three new trading-based provably fair games: ZBX, BLAST, and FALL.

- **ZBX:** A provably fair trading game where you can use leverage up to 100x to trade and play. You simply need to decide whether to place a bet on higher or lower. Select a timeframe (optional). Choose your leverage and place your bet. If you bet that the price goes higher and you select 1 minute, for example, the final price after the time expiration ends determines whether you win or not. You can use the ROI calculator to simulate winnings before you play.
 - ZBX features a unique Insurance Zone that offers instant 5% rakeback even if you lose the trade. In the ZBX game, players can claim an instant 5% rakeback if certain conditions are met. To qualify for the instant rakeback, players must first select a timeframe—options include 30 seconds, 1-2-3-4-5 minutes before placing a bid. If the bid results in a loss, the player is eligible for the rakeback if the final price remains within a 5% margin of error from the chosen end price at the end of the selected timeframe. This feature adds an extra layer of strategy and reward to the ZBX game, ensuring that players can recover some of their stakes even in the event of a loss.

- **BLAST and FALL:** Unique, provably fair trading games available on Zonebit.com. Unlike the forex market, which closes on weekends, these graphs/games can be traded any day and anytime, providing a simulated and provably fair market experience.
 - ▶ **BLAST** is a provably fair trading game with a frequency of 300 ticks to determine how often, on average, the price will blast (instant upward movement). The objective is to predict the market's upward movement, referred to as a "blast." The chart generally shows a pattern of slow declines, where players must decide when to place a bid based on the anticipated upward movement. However, players can predict higher or lower prices as they wish. It's a high-risk, high-reward game that challenges players to anticipate upward market movements accurately.
 - ▶ **FALL** is a provably fair trading game with a frequency of 300 ticks to determine how often, on average, the price will experience a fall (instant downward movement). The objective is to predict the market's downward movement, referred to as a "fall." The chart typically displays a pattern of slow rises, where players must decide when to place a bid based on the anticipated downward movement. However, players can predict higher or lower prices as they wish. It's a high-risk, high-reward game that challenges players to anticipate downward market movements accurately.

We are currently working on **3 new algorithms/trading games**, which will be live before 2025 on Zonebit.com

4. Supply Distribution

The \$ZONE tokenomics are designed to ensure fair distribution, incentivize long-term holding, and support the ongoing development of the Zonebit platform.

- **Initial Distribution:**
 - Season 2: **25% (Locked)**
 - Airdrop: **10%**
 - Team: **7.5% (Locked)**
 - \$ZONE Staking/Community Rewards Pool: **7.5%**
 - LP: **50% (Burned)**

▶ **Season 2**

Season 2 marks the start of the casino revolution on the blockchain. We have been working on an initiative called UGC that is scheduled to launch in Season 2. UGC will remove all the

barriers between players and the casino, fostering a collaboration never seen before. More details about UGC will be shared closer to the Season 2 kickoff date.

To kick off Season 2, 25% of the supply will be locked on Pinksale for 120 days. Unlocking this supply doesn't mean it will increase the circulating supply immediately. Only a portion of it will be used for UGC, and the rest will be locked again. The exact amount will be announced before unlocking.

▸ **Airdrop**

10% of the supply will be allocated for an Airdrop **to holders of one of the strongest meme communities**, on-chain casino users, and active traders on Solana.

Zonebit X account will hold a competition on X where all Solana meme token communities can participate. The community with the highest engagement will earn **5%** of the supply airdrop.

2.5% of the supply will go to known casino token investors/players on Solana.

The remaining **2.5%** will be airdropped to players wagering and being active on zonebit.com

▸ **Team**

7.5% of the supply will also be locked and allocated to the team via linear vesting throughout 365 days. 1:12 of the allocated team supply will unlock every 30 days. The first unlock will happen 30 days after the token launch.

▸ **Staking + Community Rewards Pool**

7.5% of the supply will be allocated to a staking + community rewards pool. Zonebit's unique '**buyback and boost**' mechanism will continuously grow this pool. More details are below.

This pool will be used to payout staking rewards and drive new users and investors into the ZONE ecosystem.

▸ **LP**

The remaining 50% of the supply will be matched with X amount of SOL (will be announced) and **fully burned**.

5. \$ZONE Utilities

- **Increased Rakeback on Zonebit.com:** By staking \$ZONE, users can earn APY rewards, incentivizing long-term participation and commitment to the Zonebit ecosystem. This will result in a higher rakeback percentage on Zonebit.com, up to 12%. (default rakeback for all players is 5%)
 - ▶ Hold & stake up to,
 - >\$250 worth of \$ZONE for a 1% Rakeback increase
 - >\$1,000 worth of \$ZONE for a 1.5% Rakeback increase
 - >\$2,500 worth of \$ZONE for a 2% Rakeback increase
 - >\$5,000 worth of \$ZONE for a 2.5% Rakeback increase
 - >\$10,000 worth of \$ZONE for a 3% Rakeback increase
 - >\$25,000 worth of \$ZONE for a 3.5% Rakeback increase
 - >\$50,000 worth of \$ZONE for a 4% Rakeback increase
 - >\$100,000 worth of \$ZONE for a 4.5% Rakeback increase
 - >\$250,000 worth of \$ZONE for a 5% Rakeback increase
 - >\$500,000 and above worth of \$ZONE for a 7% Rakeback increase
- **\$Zone DAO:** \$ZONE holders can participate in governance by staking their tokens and voting on proposals. Each vote is proportional to the number of tokens staked, ensuring that all participants have a voice in the platform's direction. The \$ZONE team and holders can present proposals.
 - ▶ DAO Voting/Proposals will take place on snapshot.org and will be announced through the official Zonebit Telegram and Twitter channels.
- **Buyback & Boost Mechanism:** A revolutionary new way to structure \$ZONE governance on Zonebit. Buyback and Burn mechanisms have been slowly killing the momentum of casino tokens while creating capital inefficiency. So, we will be doing things a bit differently. Here's how buyback and boost will work;
 - ▶ We will buy back \$ZONE with a portion of the casino profits weekly. The exact amount will be announced every week after the buy.
 - ▶ These tokens will be added to the Staking + Community rewards pool.
 - ▶ Players with the highest wager volume on Zonebit will be rewarded \$ZONE with a **Weekly Boost**.

- ▶ Every week, a few lucky players who have their \$ZONE staked will get an additional airdrop of \$ZONE from the **Boost**, depending on volume.
- ▶ Weekly competitions, challenges, and contests on social media channels will be powered by **Weekly Boosts**.
- ▶ The casino will support \$ZONE while \$ZONE continues to be the core promoter of the casino. All the capital created by the ecosystem will funnel back into our key stakeholders, players, and community, creating a sustainable environment where both the casino and \$ZONE can thrive.
- **Exclusive Benefits:** \$ZONE holders will gain access to exclusive events and promotions on Zonebit, regular cash, NFT giveaways, and more. All of these will be announced through Telegram and Twitter channels.
- **\$ZONE Staking Program Options:**
 - **15 Days:** 8% APY
 - Ideal for those who prefer flexibility with a shorter commitment.
 - **30 Days:** 10% APY
 - A moderate lock-up period offers higher rewards compared to the 15-day option.
 - **60 Days:** 12% APY
 - Encourages a longer commitment with better rewards.
 - **90 Days:** 15% APY
 - The highest available APY is designed for dedicated stakeholders looking for maximum rewards.
- ▶ **Lock-in Periods:** Participants can choose from 15, 30, 60, or 90 days. The longer the lock-in period, the higher the rewards, in addition to the increase rakeback percentage on Zonebit.com. Unstaking before the lock-in period ends won't be available to prevent usage manipulation for increased rakeback on our platform.
- ▶ **Example:**
 - ✓ Staking 10,000 \$ZONE for 90 Days:
 - At a 15% APY, you would earn approximately **375 ZONE** in rewards over 90 days. Longer lock-in periods increase staking rewards and boost your rakeback percentage on the Zonebit platform.

Staking Rewards and Inflation

Staking rewards in the ZONE ecosystem can be seen as a form of controlled inflation:

1. **Circulating Supply Increase:** As staking rewards are distributed, the circulating supply of ZONE tokens increases, similar to how inflation introduces more currency into an economy. But the max supply remains the same. 1B tokens. Forever.
2. **Inflation Rate:** The APY rates (ranging from 8% to 15%) represent the effective annual inflation rate, assuming these rewards are new tokens in circulation.
3. **Controlled Inflation:** Unlike uncontrolled inflation, staking rewards are part of a carefully managed system designed to incentivize long-term holding and participation, thus contributing to our ecosystem's stability.
4. **Incentive Mechanism:** This controlled inflation encourages users to lock up their tokens, reducing the liquid supply and potentially increasing token value through demand.
5. **Reinvestment:** The Buyback & Boost strategy, where tokens are bought back and reinvested into the staking pool, helps balance the inflationary effects by reducing the circulating supply and maintaining ecosystem health and token value.

The ZONE staking program is designed to reward participants while ensuring the long-term sustainability and growth of the ecosystem. By offering tiered APYs based on lock-in periods, the program encourages varying levels of commitment while ensuring that rewards are both attractive and sustainable. The integration of staking rewards as a form of controlled inflation, combined with the Buyback & Boost strategy, ensures that the ecosystem remains vibrant, secure, and rewarding for all participants.

6. Referrals

Zonebit has one of the most competitive referral commission rates in the industry. We are the first casino to offer a 2-tiered Referral System that allows you to earn commission from users your referrals bring to our platform.

The standard referral commission is 10% for every user you bring to our platform. You earn commission on their every wager. When a new user enters your code to sign up and play, you will earn **10% of the house edge of every bet they place.**

And once that user brings their own referrals to the platform, for each user, you will earn an additional **2% of the house edge of every bet they place.**

All of our referral commissions are valid for a lifetime. The rates can be negotiated (upwards) with partners who bring in high-roller players to our platform.

The referral program rules are subject to change, and any account with suspicious activity will be permanently banned from our platform.

7. Roadmap

1. **Q4 2024:** Launch of **zonebit.com** beta v0.1
2. **Q4 2024:** Launch of \$ZONE token, initial distribution, and staking platform.
3. **Q4 2024:** Implementation of governance features, allowing \$ZONE holders to vote on key proposals.
4. **Q4 2024:** Launching new games on zonebit.com powered by \$ZONE
5. **Q4 2024:** Multiple CEX Listings
6. **Q4 2024:** Launching \$ZONE as a playable currency on Zonebit.com
7. **Q1 2025:** Launch of Season 2 & UGC(casino revolution)
8. **Q1 2025:** Continuous development and integration of new features based on community feedback and governance decisions.

8. Conclusion

\$ZONE is more than just a governance token; it is the key to unlocking a decentralized, community-driven future for Zonebit. With its use cases, fair tokenomics, and commitment to empowering users, \$ZONE is poised to become a cornerstone of the Zonebit ecosystem. Join us in shaping the future of crypto trading and gaming with \$ZONE, first on Solana and then the rest of the industry.
