PROFESSIONAL SUMMARY

UI/UX & Product Designer with experience owning end-to-end design for ed-tech and fintech platforms. Specializing in dashboard and SaaS design, information architecture, and design systems, with a track record of simplifying complex, multi-product platforms into intuitive user experiences. Combining strong visual design sensibility with an AI-assisted, design-to-code workflow (Figma to production UI using Claude Code and Codex) to independently take products from concept to shipped interface.

WORK EXPERIENCE

Graposs Edutech Pvt. Ltd. (Graposs Connect)

UI/UX Designer | April 2025 - Present, New Delhi

Sole UI/UX designer across Graposs Connect's full product portfolio, owning design end-to-end from research through high-fidelity UI and, in some cases, production code.

- **Shine Olympiad - Student & Admin Dashboard, Website, Mobile App, Test Screens/Reports (responsive):** Redesigned the entire product; introduced personalization, simplified navigation, and reduced the number of clicks to reach key resources. Designed a gamification system (badges, leaderboard, community) and an assignments feature that lets teachers and mentors assign work directly to students. Also designed the mobile application, including onboarding screens.
- **Sarkari Pariksha - Student Dashboard (responsive):** Redesigned the dashboard from the ground up; added a task-planning widget, a trending exams section, and current affairs integration to support exam preparation.
- **Whitelabel - Admin & Student Dashboard (responsive):** Consolidated a highly fragmented, multi-page admin experience with numerous tabs into a simplified, easy-to-understand structure for users across all skill levels; extended the student dashboard to support multi-product access - one of the most complex dashboards in the portfolio in terms of pages, constraints, and functionality.
- **Naukri Connect (responsive):** Designed and structured the current affairs section of the website, organizing daily updates into a categorized, scannable layout tailored for exam and job-prep readers to improve content discoverability and engagement.
- **Graposs Connect - corporate website (responsive):** Led a full redesign into a modern SaaS brand identity.
- **Self Analyse (responsive):** Owned the product end-to-end - logo, website, student dashboard, and test screens/reports for multiple psychometric assessments, plus counselling listing and booking flows.
- **iPoint India:** Designed the website from the ground up, defining the sitemap, visual identity, and page layouts to establish a clean, credible online presence for the brand.
- **Test Series (responsive):** Led design and build of both the product and website: wireframes and low-fidelity flows in Figma, a high-fidelity reference design, then hand-coded the production UI using Claude Code and Codex — the first project taken from design through full implementation. Also designed the mobile application, including onboarding screens.

Growhiz Technology Pvt. Ltd. (FinshellPay)

UX/UI Design Intern | March 2024 – August 2024, New Delhi

- Assisted in user research, competitive analysis, and requirement gathering for fintech products
- Designed wireframes, UI screens, and interactive prototypes for key user workflows
- Supported usability testing and design iteration based on user feedback

- Contributed to design guidelines and reusable UI components
- Designed advertisement creatives for marketing campaigns

CDAC – Centre for Development of Advanced Computing

Web Developer Trainee | August 2023 – December 2023, Delhi

- Developed the Home and About pages for the India–Solomon Islands CEIT website
- Worked with educational website templates and structured layouts
- Completed induction training on Machine Learning fundamentals and applications using Python

RS Tech Software

Web Developer Trainee (Hybrid) | November 2022 – February 2023, Delhi

- Translated UI designs and client requirements into responsive, functioning web pages
- Maintained visual and interaction consistency across pages during updates
- Optimized page layouts for performance across devices

UX Designer Trainee (Hybrid) | April 2022 – June 2022, Delhi

- Conducted target audience and user research to define user scenarios for digital products
- Designed clickable prototypes in Figma and tested them with real users
- Refined UI/UX through iterative, feedback-driven design cycles

SKILLS

UI/UX Design: User Research, Information Architecture, Wireframing & Prototyping, Usability Testing, Design Systems, Interaction Design, Micro-interactions, Responsive Design

Product Design: Dashboard & SaaS Design, Multi-Product Platform Design, Gamification Design, Design-to-Code Workflow

Design Tools: Figma, Framer, Adobe Photoshop, Adobe Illustrator

AI-Assisted Development: Claude Code, Codex (design-to-production implementation)

Front-End Fundamentals: HTML5, CSS3, JavaScript

Creative Skills: Visual Storytelling, Typography, Colour Theory, Branding

CERTIFICATIONS & TRAINING

- **Full Stack Web Development** (August 2025 – Present): HTML, CSS, JavaScript, MongoDB, Query Processing, Blockchain Basics
- Arduino-based Drone Technology Workshop (1 Week)

EDUCATION

B. Tech – Computer Science Engineering

Maharshi Dayanand University, Gurugram, India | CGPA: 7.12 | 2020 – 2025
