

OLA Energy Product line

OLA Energy Lubricants exceed most of all major original equipment manufacturers requirements. Key lubricant requirements include extended lubricant life, superior wear protection, control against deposits and filterability.

DeoMAX Diesel engine oils:

Keeping your equipment running cleaner, stronger and for longer is vital to your operation. OLA Energy DeoMAX family products are the oils of choice for heavy duty diesel engines and can assure you the performance and protection you demand. In fact, DeoMAX products maximize the protection of your assets so you can count on optimum performance when you need it most. DeoMAX engine oils exceed most of all major original equipment manufacturers requirements such as Mercedes-Benz, MAN, Volvo, MTU, Mack, Renault, Cummins, Deutz... to build outstanding products.

Key lubricant requirements include:

- Enhanced engine cleanliness
- Extended lubricant life
- Superior wear protection, control against deposits and filterability
- Prolonged component life
- Minimized operational and maintenance costs

Application	Product	Features and Benefits
Diesel engines	DeoMAX Syn 5W-40	High performance synthetic engine oil (PAO) that provides outstanding protection against wear, corrosion and oxidation and reduces deposits and sludge build up to keep engines running. Recommended for API CJ-4/ACEA E9, E7 applications.
	DeoMAX DM Ultra 10W-40	High performance semi-synthetic diesel engine oil for variety of classic and modern engines, high output engines, including those fitted with exhaust gas (EGR) working under severe conditions. Recommended for API CI-4/ACEA E7 applications.
	DeoMAX DM12 15W-40	Premium high performance diesel engine oil for variety of classic and modern engines, high output engines, working under severe conditions. Engine efficiency, long engine life in severe conditions. Recommended for API CI-4/ACEA E7 applications.
	DeoMAX DM8 15W-40	High performance oil for diesel engine working in severe conditions. Recommended for variety of engines with specification of API CG-4.
Manual transmissions	Gear Oil XHD 80W-90 / 85W-140	Premium automotive gear lubricant API GL-5 that protects commercial axles and final drives where extreme pressures and shock loading are expected. Excellent load and shock capability.
	Gear Oil BV 75W-80	Premium automotive gear lubricant especially for hypoid axles, enclosed gearboxes and manual gearboxes demanding performances defined by API GL-5 in 75W-80 grade. Excellent load and shock capability.
Automatic transmission	ATF IID / IIH	High performance fluid for automatic transmissions vehicles specifying. Long fluid life and long transmission life.
Greases	Lubix EP Series	Premium automotive gear lubricant especially for Hypoid axles, enclosed gearboxes and manual gearboxes demanding performances defined by API GL-5 in 75W-80 grade. Excellent load and shock capability.

Keep operations going with OLA Energy solutions for the fleet industry

Your goals
are ours!

OLA Energy lubricants solutions focus on providing our customers high level performance and efficiency through innovative products and top-notch technical expertise. At OLA Energy we have always been committed to the fleet business owing to our lubricants technology, combined with a strong quality control system and reliable supply chain.

Partnership and expertise

Modern fleet industries are permanently facing challenges as to equipment reliability and longevity.

OLA Energy's advanced technology lubricants provide unmatched protection and performance in the extreme conditions encountered by fleet vehicles, while supporting efforts to reduce costs and control unexpected repairs and downtime.

At OLA Energy, we assist our customers achieve effective and efficient equipment availability and increase profit contribution by aligning their goals to a vast array of lubricants and technical services.

OLA Energy products and support programs are applied by best in class field engineers who:

- Help identify minor problems before they become major failures.
- Thoroughly understand our customers' daily operations.
- Build partnerships to better support customer commercial goals.

OLA Energy products are the oils of choice for heavy duty diesel engines, they:

- Keep your equipment engines run cleaner, stronger and for longer.
- Assure you the performance and protection you demand.

OLA Energy fleet
solutions is
a welcome response
to fleet operators
looking to reduce
costs

OLA Energy Fleet Services (OFS) are designed to complement our world-class lubricants offers. Our products and services combined together will help our customer optimize its maintenance programs and enhance its equipment availability to ultimately increase its operations productivity.

The three pillars of OFS are:

OLA Energy technical training program (OTTP): a world-class lubrication training allowing competencies improvements and skills of fleet customer staff by providing them with the most current industry knowledge and efficient lubrication practices.

OLA Energy diagnostic services (ODS): a unique advanced service for engine inspection and smoke emissions analysis to carry out engine performance analysis and troubleshooting.

OLA Energy used oil analysis program (OUOAP): a predictive maintenance process based on conditions monitoring for both machine and lubricants through oil analysis to guarantee long-term productivity of critical equipment and optimize the value of investment.
