

+ HOW PREPPR WORKS

GROUNDING, VERIFIED, DECIDED BY PEOPLE

Preppr answers from two things it can show you: your organization's own knowledge, connected and cited to the page, and Preppr Verified, a library of regulations, standards and hazard models that every output is checked against. Each answer says how well it is supported, and people make every call.

CHECKED BY Preppr Verified · 1,500+ rules	EVERY ANSWER Cited to the page, labeled for support	DECISIONS Made by people, not the AI
---	---	--

Every claim cited to the county's own plans and after-action report, with the answer labeled Grounded and Well supported.

+ ACCURACY AND RELIABILITY

EVERY ANSWER SHOWS HOW WELL IT IS SUPPORTED

Labels

Grounded, or not

Answers and drafted sections are labeled:

Grounded

Needs review

Largely unsupported

Confidence

A badge on every answer

Document answers show evidence coverage, source anchoring and source diversity: how well the cited sources back that one answer.

Honesty

Says when it doesn't know

When nothing supports a claim, Preppr says so, and anything outside the library is marked Not Preppr Verified.

People

People decide

You approve each design section, the AI evaluator drafts while people make the call, and Preppr Agent sends nothing out without sign-off.

+ 1 · YOUR KNOWLEDGE

EVERYTHING YOU KNOW, CONNECTED AND CITED

MEMORY

Read and connected

Plans, after-action reports, meetings, chats and the work Preppr produces become one connected memory, and Preppr notices when they disagree.

PROVENANCE

Traced to the page

Every fact Preppr pulls out of a document keeps the page and sentence it came from, so any answer can be checked.

RULES

Your rules, kept separate

The “shall” and “must” in your own plans become Rules, kept apart from the habits Preppr observes. You approve both.

OVERNIGHT REVIEW

Learns overnight, with your say

Each night Preppr proposes what it learned, with reasons and evidence. Nothing that changes how it reasons for you happens until you accept it.

The screenshot shows the app.preppr.ai interface. At the top, it states "14,035 objects and 3,274 of 220,844 links. Click an object to see everything around it." Below this is a network graph with various nodes and links. A modal window is open, displaying a requirement: "Independent quality assurance evaluation and NRC approval is required for any r...". The requirement is marked as "active" and has "2 conn". Below the requirement text are buttons for "View", "Archive", and "click to select". To the right, a "contradicts" panel shows two plans: "21_Annex_T_Fixed_Nuclear_Facility_BL..." and "Blue_Water_Nuclear_Power_Station_-...". It lists evidence, strength (0.92), and origin (Derived by Preppr), and notes "Preppr read this link out of the text."

Traced. A requirement Preppr read out of the county's nuclear plan, and two plans it found contradicting each other, with the evidence.

+ 2 · THE ENGINE

DOCTRINE AND HAZARD DATA, NOT IMPROVISATION

Rules

Rules from the source

1,500+ rules from federal doctrine, national guidelines and regulations. Citation chips open the rule itself, so a requirement is never invented.

Hazards

Hazards that fit the place

Scenarios are checked against recognized risk baselines, including FEMA's National Risk Index and Hazus, so a Category 5 hurricane in Colorado gets flagged, not built.

Consequences

A world that reacts

In SimCell and Rehearse, every move is adjudicated against your plans and the rules, and readiness, public trust, fatigue and resources change with it.

+ 3 · PREPPR VERIFIED

CHECKED AGAINST THE STANDARDS YOU ANSWER TO

FEMA

HSEEP

CMS

NFPA 1600

ISO 22301

ISO 27001

ISO 31000

NIST CSF 2.0

CISA Cross-Sector Performance Goals

MITRE ATT&CK

EPA RMP

National Risk Index

Hazus

Preppr Verified is the library both halves draw on: regulations, resilience and continuity standards, cyber frameworks, hazard models and calculations.

+ DATA SOURCES

WHAT PREPPR READS, AND WHERE IT COMES FROM

FROM YOUR ORGANIZATION

- ✓ **Documents:** plans, after-action reports, BIAs and annexes, each fact traced to the page
- ✓ **Work in Preppr:** meetings, chats, exercises, findings and improvement actions
- ✓ **Your files:** imports from Google Drive, SharePoint and Obsidian
- ✓ **Your systems:** your own APIs and GIS layers

PUBLIC DATA AND LIVE FEEDS

National Risk Index

OpenFEMA

Hazus

HIFLD

NWS alerts

USGS

CDC

EIA grid status

NASA FIRMS

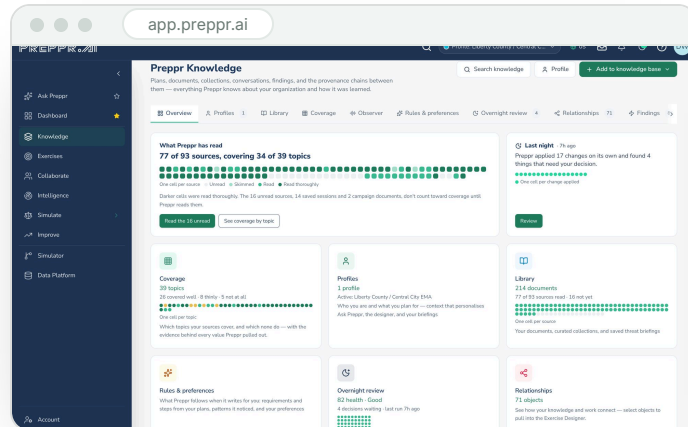

NASA EONET

Bureau of Meteorology

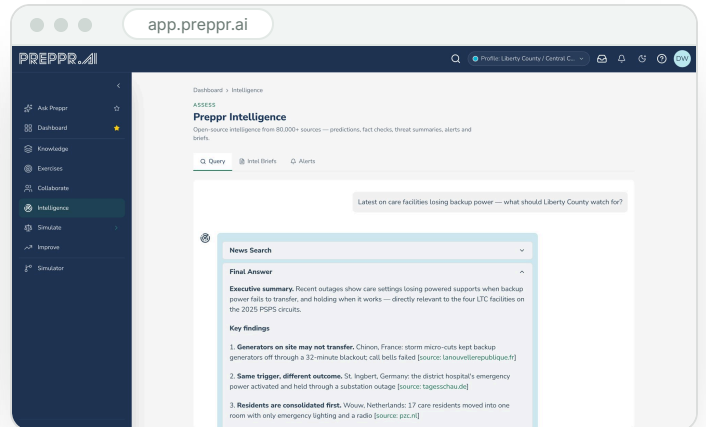

Geoscience Australia

ReliefWeb

80,000+ news sources

Your sources. What Preppr has read, what changed overnight, and which topics your sources cover.

Public sources. Intelligence briefs cite their sources, so you can check each claim.
