* AlphaVision generates evidentiary reports and media in formats suitable for upload to Axon evidence.com. Direct API integration is not implied. Customers are responsible for ingesting content into their evidence.com tenant per agency policy.

✓ Who Is Alpha Vision

Alpha Vision is a video security intelligence platform helping organizations turn surveillance video into AI-powered security intelligence with video understanding, natural-language search, automated reporting, and workflow automation.

✓ Features / Platform Highlights

Instant Crime Alerts

Send automatic notifications direct to dispatchers.

License Plate Recognition (LPR)

Help law enforcement identify stolen vehicles, suspects, missing persons, and more in seconds.

Crime Prevention & Faster Response

Equip first responders with critical information before a situation escalates.

Community Camera Integration

Connect your existing cameras to participating law enforcement agencies at an affordable cost.

Partner with us by joining the **Safer Community Network** to enhance safety across our community with real-time network analytics.

"The image quality frequently surpasses that of in-store surveillance systems... When officers are dispatched, I can access the live feed from my phone or desktop and give them real-time intelligence – improving both response time and situational awareness."

– Sgt. Jake Griffith, Taylorsville Police Department

✓ Advanced Algorithms and Specialists

Monitor

Capture and review the history of your project.

Detect

Identify activities, objects, people, and vehicles.

Respond

Alert personnel and provide documentation.
