University Pledge

We the undersigned of this university, pledge to *do no harm*. We will not be used as instruments of surveillance against our own students and staff. We recognise that the current visa compliance framework places universities in an impossible position, asked to be educators and border enforcers simultaneously. We reject that role.

We will comply with our legal obligations, but we will not go beyond them. We will not over-report. We will not withdraw support from students in crisis because their visa status has become complicated. We will not create a culture of suspicion in which international students and staff feel watched, conditional, and expendable.

We will review our compliance processes to ensure they do not exceed what is legally required and do not create unnecessary risk for students and staff. We will provide clear information to all students about their rights, about what data we hold and share, and about the support available to them regardless of their immigration status.

We will not allow tuition fee structures, visa conditions, or hostile environment policies to turn education into a transaction available only to those the state has decided to welcome. A university exists to open minds, challenge power, and extend knowledge to everyone who seeks it. We will not be conscripted into closing doors.

We will protect academic freedom, including the freedom of our students and staff to speak, organise, and advocate without fear that doing so will jeopardise their right to remain.

We sign this pledge publicly and we invite our students, our staff, and our communities to hold us to it.
