

LM Preparation Table

Carbon steel frame for preparing and organizing pieces before the sewing line

The **LM Preparation Table** is a key piece in the apparel production flow: it sits between cutting and sewing, giving operators a surface to sort, check, mark and organize fabric pieces before they go to the line. Good preparation reduces rework and keeps production moving.

Made of **carbon steel** with a light gray **powder coat** finish, for greater durability, resistance to continuous use and a professional finish. Height adjustable from **26.8 to 34.6 in (680–880 mm)**, adapting to the operator and the task.

Available **with or without 2" casters**, in three standard top sizes — or made to measure for your workstation.

26.8–34.6

ADJUSTABLE HEIGHT (IN)
