## PROJECTS

### Campus Bites — Campus Food Ordering App | Figma, User Research, Wireframing, Prototyping

- Designed a complete mobile food ordering experience for students, reducing the ordering flow to 3 steps through streamlined user journeys and information architecture.
- Conducted user research with 10+ students to identify pain points related to menu accessibility and waiting times, using insights to improve wireframes and high-fidelity prototypes.
- Created low-fidelity wireframes, interactive prototypes, and usability-focused interfaces to improve the ordering experience.

### Finanzy — Fintech Landing Page | Figma, Responsive Design, Design System

- Designed a modern fintech landing page using strong visual hierarchy, responsive layouts, and accessible colour contrast principles.
- Developed reusable UI components and interaction patterns to maintain consistency across desktop and mobile experiences.
- Applied design system principles and responsive grids to create a scalable and user-friendly interface

## **Diet Plan Tracking App — Health & Wellness App | Figma, Dashboard Design, Design System**

- Designed a health and fitness tracking dashboard enabling users to monitor meals, calorie intake, water consumption, and fitness goals.
- Built a reusable design system with colour, typography, and spacing tokens to ensure consistency across 8+ screens.
- Created data visualization components, progress indicators, and user-friendly navigation to improve information accessibility.

## **Fintech Lending Platform — Loan Management Platform | Figma, Interaction Design, User Flows**

- Designed end-to-end user flows for loan applications, repayment tracking, and loan status management.
- Simplified complex financial processes through intuitive navigation, structured information architecture, and clear interaction patterns.
- Applied usability testing feedback to refine key user journeys and improve overall user experience.
