onepagerr

ONE PAGE. BIG IMPACT.

Where your links, website, and business card finally meet.

Launch a sleek, professional one-page site in minutes, designed to grow with your business.

THE PROBLEM

Your first impression is scattered across three places.

A link in bio

Quick to share, but a plain list of buttons that says very little about you.

A website

Tells the whole story, but takes time, money and upkeep to build and keep current.

A business card

Easy to hand out, then lost in a pocket or out of date the day something changes.

OnePagerr brings all three together in one polished page.

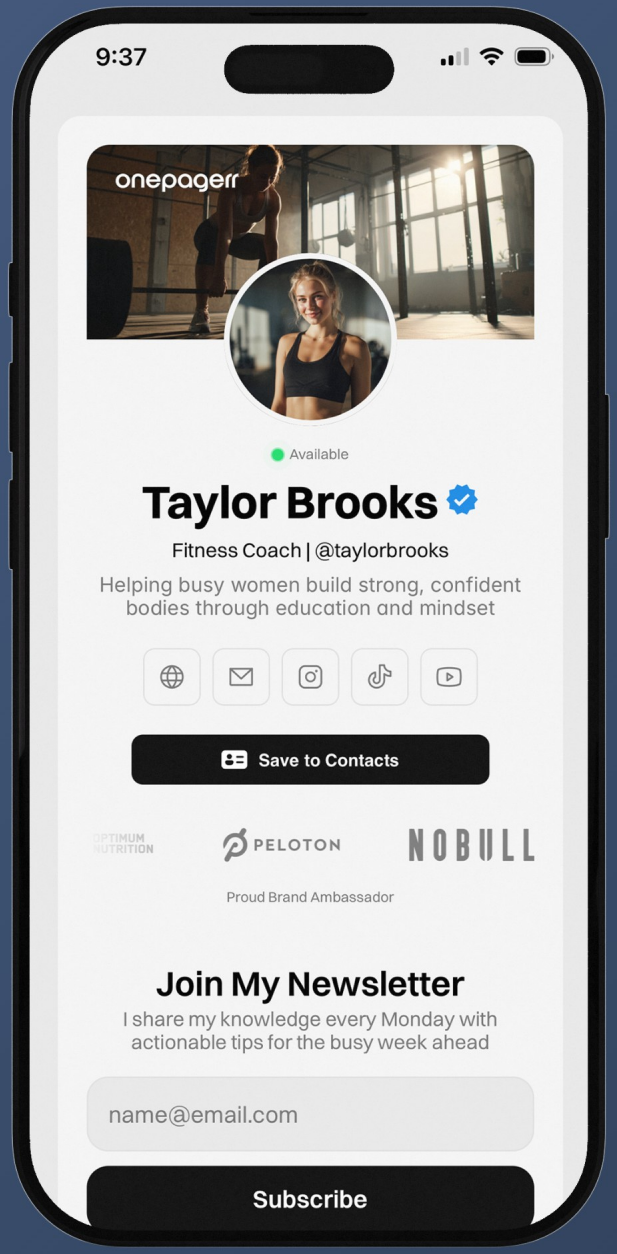

WHAT IT IS

OnePagerr is a clean, professional one-page website that showcases you, your offers and your contact info, all behind a single link.

MEET THE PAGE

Meet Taylor Brooks.

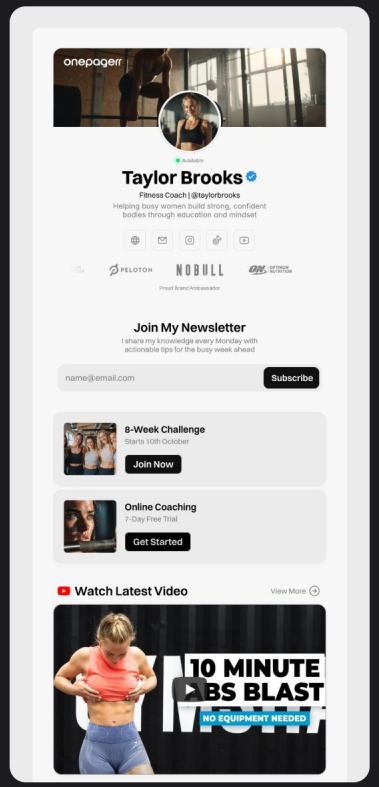

Taylor is our example page: a fitness coach whose OnePagerr shows every section the platform offers, from her profile and newsletter to products, podcast, testimonials and a contact form.

Every OnePagerr is built on this same proven layout. You bring your photos, words and links. We handle the setup.

TAP. SHARE. CONNECT.

Share it anywhere.

Put your link in your bio, email signature and texts. In person, a tap of a OnePagerr card or a scan of its QR code opens your page on their phone.

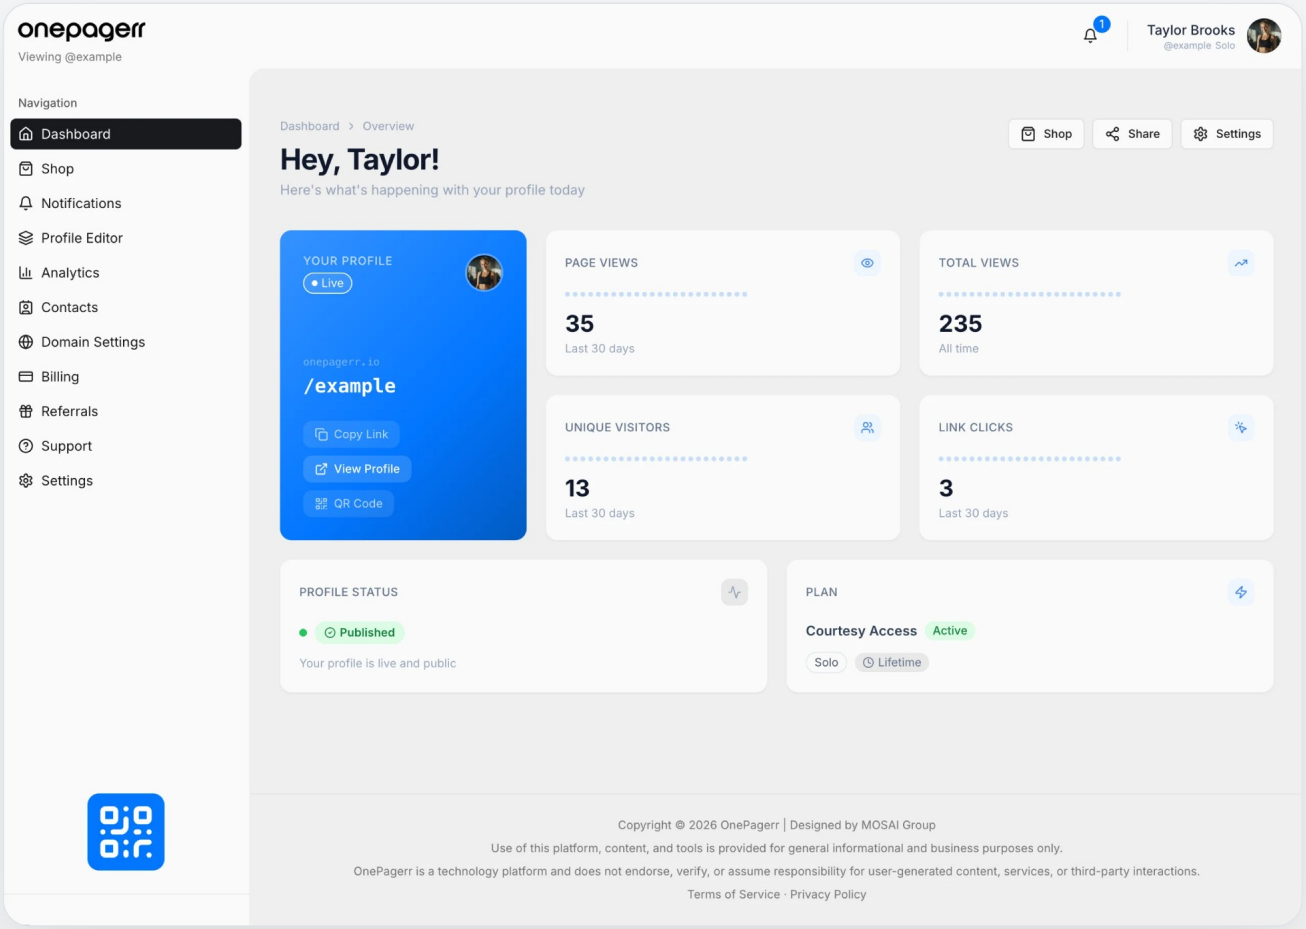

Change your page any time, and every link and card you've shared shows the update instantly.

BEHIND THE PAGE

Your dashboard runs the show.

Your link and QR code, contacts, stats and referrals, all in one place.

BUILT-IN CRM

Every connection, captured.

01

They save you

A visitor taps “Save to Contacts” and your details land in their phone.

02

They share back

They’re prompted to send you their own name and contact info.

03

It’s in your CRM

Their details are saved to Contacts in your dashboard, ready for follow-up.

Scan a paper card

Snap a photo of someone’s business card to add them, no page visit needed.

Export anytime

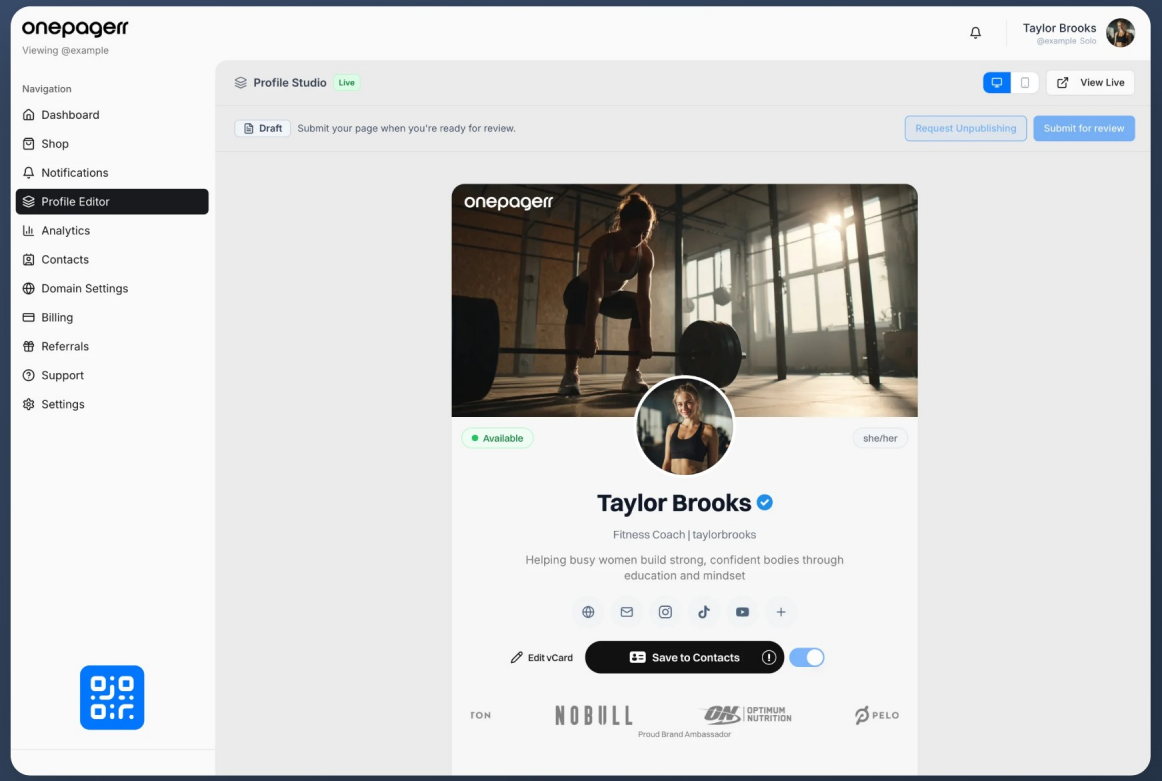

Download contacts as Excel or CSV for your CRM or email campaign software.

PROFILE EDITOR

Update your own page, any time.

The editor looks just like your live page. Change details right where they appear, then submit when you're ready.

- ✓ No tickets or waiting on anyone
- ✓ Desktop and mobile previews
- ✓ Our team handles the publishing
