Lumara Sentry

Autonomous, AI-Powered Defence

Protect every endpoint. Respond at machine speed.

Lumara Sentry is our managed endpoint protection, detection, and response service for laptops, servers, and cloud workloads. Powered by SentinelOne and managed 24/7 by our Australian SOC, it prevents, detects, and responds to threats in real time, even when devices are offline.

Why It Matters

Endpoints are a primary target

Ransomware, fileless malware, and zero-day threats are designed to bypass traditional antivirus and gain a foothold in your environment.

One device can expose the organisation

A compromised endpoint can lead to lateral movement, data theft, business disruption, and wider system compromise.

Legacy protection can't keep pace

Legacy antivirus relies on known signatures. Lumara Sentry's AI detects emerging threats. Stopping attacks before they spread.

Fast response limits the damage

Automated action can stop malicious processes, quarantine files, isolate devices, and reverse unauthorised changes before an attack spreads.

Protection backed by people

A single, lightweight agent protects Windows, macOS, Linux, and supported cloud workloads. Our Australian SOC monitors the environment, investigates suspicious activity, hunts for hidden threats, and helps drive incidents through to resolution.

How Lumara Sentry Protects You

Complete endpoint protection, detection, and response across your fleet, managed and monitored 24/7 by our Australian-based Security Operations Centre.

AI Threat Prevention

Behavioural AI blocks known, unknown, and zero-day threats before they execute.

Autonomous Response

Detect and respond at machine speed, even when a device is offline.

One-Click Remediation

Reverse unauthorised system changes and reduce recovery time and disruption.

Managed Threat Hunting

Australian SOC analysts proactively search for hidden threats and adversary activity.

Deep Endpoint Visibility

Process-level data reveals an attack from initial compromise to lateral movement.

Cross-Platform Coverage

Protect Windows, macOS, Linux, and supported cloud workloads with one agent.

Choose the Right Level of Protection

Choose from three Lumara Sentry tiers to match your environment, risk profile, and operational needs.

Core

Essential endpoint protection to replace legacy antivirus.

- Next-generation antivirus and endpoint protection
- Static and behavioural AI threat prevention
- Autonomous response, remediation, and rollback
- Storyline incident context, forensics, and reporting

Control

Core protection with greater device and network control.

- Everything in Core
- Firewall and location-aware network control
- Granular USB and Bluetooth device control
- Rogue device discovery to identify unprotected endpoints

Complete

Advanced EDR and XDR visibility for investigation and response.

- Everything in Core and Control
- Extended endpoint and cloud workload visibility
- Advanced telemetry, threat hunting, and investigation
- Full Remote Shell and expanded response capabilities

Global Technology. Australian Expertise.

Powered by SentinelOne

SentinelOne Singularity Endpoint provides AI-powered prevention, detection, and response through one lightweight agent. It helps contain ransomware, zero-day exploits, and fileless attacks, online or offline, with one-click remediation and rollback.

Lumara Sentry brings this technology together with 24/7 monitoring, investigation, and response from Secure ISS's Australian SOC.

Gartner®

Recognised as a Leader in Endpoint Protection

SentinelOne has been named a Leader in the 2026 Gartner® Magic Quadrant™ for Endpoint Protection Platforms, marking its sixth consecutive year in the Leaders Quadrant.

Protecting Australians since 2006

Australia is Secure when Australian talent defends it.

Lumara is built by Secure ISS, a sovereign Australian cybersecurity and technology services provider trusted across government, education, healthcare, and industry. With deep understanding of Australia's regulatory environment and threat landscape, we deliver intelligence-led security designed for local conditions.

Sovereign 24 / 7 SOC run in Australia, by Australians

Developing Australian cyber talent with local partners

AI-driven security grounded in Australian values
